Kant's Transition Project and Late Philosophy Oliver Thorndike, 2018-01-11 Kant's Transition Project and Late Philosophy is the first study to provide a close reading of the connection between texts written by Kant during 1796 and 1798. Connecting Kant's unfinished book project the *Opus postumum* with the *Metaphysics of Morals* it identifies and clarifies issues at the forefront of Kant's focus towards the end of his life. Labelled by Kant as the Transition Project the *Opus postumum* generates debate among commentators as to why Kant describes the project as filling a gap within his system of critical philosophy. This study argues for a pervasive transition project that can be traced through Kant's entire critical philosophy and is the key to addressing current debates in the scholarship. By showing that there is not only a Transition Project in Kant's theoretical philosophy but also a Transition Project in his practical philosophy it reveals why an accurate assessment of Kant's critical philosophy requires a new understanding of the *Opus postumum* and Kant's parallel late writings on practical philosophy. Rather than seeing Kant's late thoughts on a Transition as afterthoughts they must be seen at the centre of his critical philosophy.

Back Over the Sexual Contract Lorenzo Rustighi, 2021-12-27 Is patriarchy an illness of democratic societies or a structural problem? To answer this dilemma *Back Over the Sexual Contract*. A Hegelian Critique of Patriarchy examines the dilemma of patriarchy in modern European political theory by reopening the question of the sexual contract. Through a study of the thought of Thomas Hobbes, John Locke, Jean Jacques Rousseau and Immanuel Kant, Lorenzo Rustighi argues that the conceptual roots of male patriarchal entitlement should be sought in the logic of authorized power that underpins the modern understanding of both the state and the family. Challenging the mainstream distinction between the private and the public, Rustighi provocatively suggests that patriarchy is not something that undermines democracy as an alien threat but is rather inscribed in the intrinsically anti-democratic effects of the concept of democracy construed by the modern rationale of the social contract. He puts forward a Hegelian argument to propose an unconventional constitutional approach to feminist political theory that helps us rethink democracy beyond its inherent impasses.

Although Kant was involved in the education debates of his time it is widely held that in his mature philosophical writings he remained silent on the subject. In her groundbreaking *Kant's Conception of Pedagogy* G. Felicitas Munzel finds extant in Kant's writings the so-called missing critical treatise on education. It appears in the *Doctrines of Method* with which he concludes each of his major works. In it Kant identifies the fundamental principles for the cultivation of reason's judgment when it

comes to cognition beauty nature and the exercise of morality while subject to the passions and inclinations that characterize the human experience From her analysis Munzel extrapolates principles for a cosmopolitan education that parallels the structure of Kant's republican constitution for perpetual peace With the formal principles in place the argument concludes with a query of the material principles that would fulfill the formal conditions required for an education for freedom

The American Journal of Anatomy, 1925 The Will and Its Brain H. H. Kornhuber, Lüder Deecke, 2012-09-11 In 1964 1965 Hans Helmut Kornhuber and Lüder Deecke achieved a scientific breakthrough with the discovery of the Bereitschaftspotential BP or readiness potential In *The Will and its Brain* Kornhuber and Deecke present evidence that proves we can record activity from the human brain occurring prior to our volitional movements or actions Such preparatory activity is generated by specific brain regions particularly by the supplementary motor area SMA of the frontal lobe which lies on the inner surface of the brain between the hemispheres The primary precentral motor cortex MI later becomes activated in preparing for action Consequently the authors discriminate between two components of the preparatory activity of the Bereitschaftspotential an early SMA generated BP1 and a late MI derived BP2 Between BP1 and BP2 the intentional activity runs over the so called motor loop via the basal ganglia Kornhuber and Deecke discuss these and other brain processing systems while focusing on the concept of free will They claim that we indeed have free will It may not be absolutely free but free in terms of degrees We can take efforts to increase our degrees of freedom through self improvement but we can also lose degrees of freedom through self mismanagement

IV HENRY FIELD, 1957 *Kants Vorsehungskonzept Auf Dem Hintergrund der Deutschen Schulphilosophie Und -Theologie* Ulrich L. Lehner, 2007 It is widely agreed that Protestant scholasticism influenced Kant's thinking on the question of Divine Providence But the nature and extent of that influence have never been explored in detail This is the scholarly lacuna the present volume seeks to fill It shows how Kant from his pre Critical period onward grappled with the concept of Divine Providence sought to subjectivize and naturalize it and how Protestant scholasticism played an important role both positive and negative in this endeavor It also makes clear how this critical philosophical conversation gave rise to a powerful notion of the progress of the human species a vital part of the Enlightenment's enduring legacy This study thus provides not only a unique theological philosophical overview of 18th century speculation on the question of Divine Providence it also sheds important new light on the significance of the German Enlightenment
