Ui Is Communication:

UI is Communication Everett N McKay, 2013-05-24 User interface design is a challenging multi disciplinary activity that requires understanding a wide range of concepts and techniques that are often subjective and even conflicting Imagine how much it would help if there were a single perspective that you could use to simplify these complex issues down to a small set of objective principles In *UI is Communication* Everett McKay explains how to design intuitive user interfaces by focusing on effective human communication A user interface is ultimately a conversation between users and technology Well designed user interfaces use the language of UI to communicate to users efficiently and naturally They also recognize that there is an emotional human being at the other end of the interaction so good user interfaces strive to make an emotional connection Applying what you learn from *UI is Communication* will remove much of the mystic subjectiveness and complexity from user interface design and help you make better design decisions with confidence It s the perfect introduction to user interface design Approachable practical communication based guide to interaction and visual design that you can immediately apply to projects to make solid design decisions quickly and confidently Includes design makeovers so you can see the concepts in practice with real examples Communication based design process ties everything from interaction to visual design together

Intuitive Design Everett McKay, 2018-02-07 Make your designs immediately self explanatory and easy to use and never agree to disagree again about whether they are intuitive Your mission To design an intuitive UI for your next project Your problem You re not sure what intuitive UI really means Worst problem Your team isn t sure either so your discussions about intuitive design are unproductive and opinion driven If this sounds familiar *Intuitive Design Eight Steps to an Intuitive UI* will give you the insight principles and guidelines you need to get the job done You ll learn the objective and actionable steps for designing intuitive UIs for mobile web and desktop apps Mission accomplished

The Mathematical Theory of Semantic Communication Kai Niu, Ping Zhang, 2025-05-31 This Open Access Book explores how classical information theory s focus on syntactic information has limited the further development of communication science Recently communication technologies that handle and transmit semantic information have gained widespread attention in academia Semantic communication has paved new directions for the future of communication technology development yet it lacks a general mathematical guiding theory To address this challenge this open access book constructs a theoretical framework for semantic information theory and provides a systematic exposition of the measurement system for semantic information and the theoretical limits of semantic communication It serves as a professional reference for researchers in information and communication The book begins by deeply analyzing the data characteristics of various information sources and the needs of downstream tasks to summarize and generalize the universal attribute of semantic information synonymity and to define the synonymous mapping between semantic information and syntactic information Stemming from this core concept synonymous mapping this book introduces the measures of semantic information It then introduces a new mathematical tool Synonymous Asymptotic

Equipartition AEP to explore the mathematical properties of synonymous typical sequences and applies random coding and synonymous typical sequence decoding encoding to prove the semantic lossless source coding theorem semantic channel coding theorem and semantic limited distortion source coding theorem In addition the semantic information measures in the continuous case are discussed and a new channel capacity formula of the band limited Gaussian channel is obtained which is an important extension of the classical channel capacity The book is a valuable resource for researchers academics and professionals in the field of information and communication particularly those interested in advancing the frontiers of semantic communication technology

Information and Communication Security Vijay Varadharajan, Yi Mu, 2004-06-01

ICICS 99 the Second International Conference on Information and Communication Security was held in Sydney Australia 9-11 November 1999 The conference was sponsored by the Distributed System and Network Security Search Unit University of Western Sydney Nepean the Australian Computer Society IEEE Computer Chapter NSW and Harvey World Travel I am grateful to all these organizations for their support of the conference The conference brought together researchers designers implementors and users of information security systems and technologies A range of aspects was addressed from security theory and modeling to system and protocol designs and implementations to applications and management The conference consisted of a series of refereed technical papers and invited technical presentations The program committee invited two distinguished key note speakers The first keynote speech by Doug McGowan a Senior Manager from Hewlett Packard USA discussed cryptography in an international setting Doug described the current status of international cryptography and explored possible future trends and new technologies The second keynote speech was delivered by Sushil Jajodia of George Mason University USA Sushil's talk addressed the protection of critical information systems He discussed issues and methods for survivability of systems under malicious attacks and proposed a fault tolerance based approach The conference also hosted a panel on the currently much debated topic of Internet censorship The panel addressed the issue of censorship from various viewpoints namely legal industrial governmental and technical

 Experts analyze the recent emphasis on central communication as an additional policy and accountability device In recent
 years central bankers have placed new emphasis on communication with financial markets and the general public They have
 done this not only through the traditional channel of monetary policy pronouncements but also by increasing the quantity of
 information they make public Yet as central banks strive to provide more and clearer information about the outlook for the
 economy they must balance their capacity to steer economic expectations with their natural caution about committing to
 future monetary policy paths This volume offers a variety of perspectives on the economic implications of increased central
 bank communication Contributors offer theoretical analyses of the effect of central bank communication on the general
 macroeconomic environment consider a variety of novel empirical approaches to the issue and analyze communication
 decision making and governance practices of the Greenspan era U S Federal Reserve the fledgling European Central Bank
 and a variety of smaller central banks including those of the Czech Republic Sweden England and New Zealand Contributors

Security in Emerging Wireless Communication and Networking Systems Qijun Gu, Wanyu Zang, Meng Yu, 2010-01-13 The
 First ICST International Workshop on Security in Emerging Wireless Communication and Networking Systems SEWCN 2009
 was held in Athens Greece September 14 in conjunction with SecureComm 2009 SEWCN 2009 was sponsored by the Institute
 for Computer Sciences Social Informatics and Telecommunications Engineering ICST The Workshop Chairs were Qijun Gu
 from Texas State University San Marcos USA and Wanyu Zang from Western Illinois University USA The workshop invited 20
 researchers from academia and industry around the world in the areas of networking and security to form the Program
 Committee The workshop received nine submissions and each submission received two or three double blind reviews The
 review process started on July 6 and ended on July 27 In all 21 reviews were received Based on the review scores and
 comments seven papers with average score 0 or better were accepted for presentation and inclusion in the workshop
 proceedings The workshop emphasized new ideas for secure architectures and protocols to enhance the emerging wireless
 systems The accepted papers cover topics on applied cryptography key management vulnerability analysis privacy
 authentication and intrusion detection for emerging wireless systems The papers were presented in two sessions chaired by
