Power and Party in an English City David G. Green, 2013-06-17

Power and Party in an English City provides an account of how decisions are taken by the state at the level of locality More specifically it is an account of the private policy making activities of a ruling Labour group of councillors in the major English city of Newcastle Upon Tyne Despite the fact that local government in most of the towns and cities of England is one party government very little is known about the private behaviour of ruling party groups In this book David Green provides a penetrating empirical study of the realities of local government The author seeks to examine and analyse the importance of party discipline the relationship between the Labour group of councillors and the party outside the council the power of the committee chairmen the role of local patronage and the openness of the local policy making process The government of Newcastle is perhaps the most closely associated in the public mind with T Dan Smith the corrupt local politician In fact Smith had left local politics in Newcastle in the mid 1960s How was the city being run a decade or so later This study is however much more than an inside view of the affairs of a single authority The last part of the book is devoted to a discussion of aspects of some traditional and modern theories of democracy and specifically to what the author sees as the inadequate advocacy of participatory democracy in recent years Green makes a major contribution to our thinking about the kind of democracy that is possible in modern large scale societies explores weaknesses of modern theories and puts forward some original modifications to modern democratic theory in the light of a theory of knowledge which is seen as more appropriate for modern natural and social scientific activity This book was first published in 1981

London and the English Economy F. J. Fisher, 1990-01-01 This book brings together the articles on which Fisher's reputation was founded It deals with central features of the English economy in particular the importance of London both as a social and economic hub and the nature of internal and external trade The essays can rightly be described as classics
