Conflicts in Conservation Stephen M. Redpath,R. J. Gutiérrez,Kevin A. Wood,Juliette C. Young,2015-05-07 Conflicts over the conservation of biodiversity are increasing and are serious obstacles to wildlife conservation efforts worldwide Changing patterns in land use over exploitation pollution climate change and the threat posed by invasive species all challenge the way we currently maintain and protect biodiversity from the local management of single species to the international management of resources Integrating approaches from different academic disciplines policy makers and practitioners this volume offers a radically new cross disciplinary multi scale approach to deal with conflicts Groundbreaking strategies for conservation are analysed and a large section of the book is devoted to exploring case studies of conflict from around the world Aimed primarily at academics researchers and students from disciplines relating to conservation ecology natural resources management and environmental governance this book will be equally valuable to conservation NGOs and practitioners and the policy community at national and international levels

Human-Wildlife Interactions Beatrice Frank,Jenny A. Glikman,Silvio Marchini,2019-05-02 Presents solutions to turn conflict into tolerance and coexistence with an emphasis on

the human dimensions of human wildlife interactions Human-Wildlife Interactions Michael R. Conover, Denise O. Conover, 2022-01-05 This book won the 2023 The Wildlife Society Publication Award in the authored book category Human wildlife interactions increase exponentially as more and more humans and wildlife crowd into the same limited space Such interactions often become conflicts when wildlife threaten human health and safety well being or the food supply This second edition of Human Wildlife Interactions From Conflict to Coexistence provides a comprehensive review of the severity of these problems and the methods used to resolve clashes between humans and wildlife During his forty year career as a wildlife professor and scientist Dr Michael Conover founder of journal Human Wildlife Interactions has become a recognized leader of the scientific field of human wildlife interactions In this book he presents the range of methods for wildlife damage management including employing lethal methods distributing supplemental food changing the behavior of either humans or wildlife and excluding or repelling wildlife Backed by numerous case studies and informative side bars the book documents resolutions to specific human wildlife conflicts throughout the literature Containing full color illustrations throughout the second edition of Human Wildlife Interactions From Conflict to Coexistence provides authoritative coverage and depth of both theoretical and practical information It serves as an invaluable resource for students researchers and professional wildlife managers Disclaimer Figure 7 7 b on page 251 was incorrectly attributed in previous printings The photographer of figure 7 7 b is Cynthia Herrick *Wildlife Research* ,2015 **The Canadian Field-naturalist** ,1978 Transactions, the XIXth IUGB Congress: Wildlife management International Union of Game Biologists. Shackleton,1997 Wild caprinae including sheep and goats are an extremely valuable group of mammals While most live in mountains some inhabit desert grasslands tropical forests or even arctic tundra They range in size from the 30kg goral to the 350kg musk ox and display a variety of horn shapes and sizes as well as coat and body coloration They are highly prized by hunters on account of their horns and their coats Today despite their important domestic relations many wild caprinae are in danger of being lost forever over 70 of caprinae taxa are threatened and over 30 endangered or critical

The main threats to them are over harvesting habitat loss and resource competition from livestock Some face an additional threat from trophy hunters Despite this however conservation legislation is either absent or more often poorly enforced This action plan explores the value of caprinae to biodiversity the threats facing the members of the species and makes recommendations to reverse current trends It also emphasizes the importance to carpineae conservation and survival of close collaboration among all parties involved in wildlife conservation including local peoples and hunting organizations governments scientists and academic institutions

Wildlife Production--conservation and Sustainable Development Lyle A. Renecker, Robert J. Hudson (Ph. D.), 1991 *Animal Production Systems in Neolithic Central Europe* Margaret Glass, 1991 Based on a Calgary doctoral thesis this study investigates the variability in faunal assemblages from both Bandkeramik and later Neolithic settlements over a wide area of central Europe A discussion of the interpretation of the Neolithic economy is followed by analyses of faunal assemblages investigation of the patterns of species dominance and hypotheses about domestic animal production
