Oops, No It Isn't Ronald Gauch,2008-10-26 The truth is few people know the first thing about clinical research The public reads about a medical research project that announces unbelievable results for a miraculous drug Some years later another investigation completely wipes out those initial favorable findings Hormones Cut Women's Risk of Heart Disease San Francisco Chronicle 1994 Hormones Don't Protect Women from Heart Disease Study Says Washington Post 2001 The people are confused because we do not understand the process behind these conflicting results Our health and in fact our very lives are dependent on clinical trials but we know little about them This book explains the issues the public needs to be aware of when it comes to clinical research It uncovers the problems in medical investigations that can not be overcome no matter how much care and diligence medical researchers bring to a research project The basic premise that drives the writing is that it is impossible for medical researchers to guarantee that they can get all the right answers from a single study No matter how good the investigators are no matter how well a study is planned no matter how carefully the plans are executed and no matter how conscientiously the results are analyzed and interpreted the answer may still be wrong The deck is stacked against medical researchers and the public you should be skeptical of the results no matter how impressive they seem on the surface **Feminist Review** The Feminist Review Collective,2005-07-18 In this issue each article addresses a topical and controversial theme in contemporary feminist debate pornography the veil HRT disability and the Inkatha Women's Brigade *Weekly World News* ,2002-01-22 Rooted in the creative success of over 30 years of supermarket tabloid publishing the

Maternal Transition Candace Johnson, 2014-07-11. What are the political dimensions that are revealed in women's preferences for health care during pregnancy and childbirth? The answers to this question vary from one community to the next and often from woman to the next, although the trends in the Global North and South are strikingly different. Employing three conceptual frames: medicalization, the public-private distinction, and intersectionality, Candace Johnson examines these differences through the narratives of women in Canada, the United States, Cuba, and Honduras. In Canada and the United States, women from privileged and marginalized social groups demonstrate the differences across the North-South divide, and women in Cuba and Honduras speak to the realities of severely constrained decision making in developing countries. Each case study includes narratives drawn from in-depth interviews with women who were pregnant or who had recently had children. Johnson argues that women's expressed preferences in different contexts reveal important details about the inequality that they experience in that context, in addition to as various elements of identity. Both inequality and identity are affected by the ways in which women experience the division between public and private lives, the life of the community and the life of the home and family, as well as the consequences of intersectionality, the combinations of various sources of disadvantage, and women's reactions to these, either in the form of resistance or compliance. The rigorous and highly original cross-cultural and comparative research on health, gender, poverty, and social context makes *Maternal Transition* an excellent contribution to global maternal health policy debates.
