PRICAI 2021: Trends in Artificial Intelligence Duc Nghia Pham, Thanaruk Theeramunkong, Guido Governatori, Fenrong Liu, 2021-11-01 This three volume set LNAI 13031 LNAI 13032 and LNAI 13033 constitutes the thoroughly refereed proceedings of the 18th Pacific Rim Conference on Artificial Intelligence PRICAI 2021 held in Hanoi Vietnam in November 2021 The 93 full papers and 28 short papers presented in these volumes were carefully reviewed and selected from 382 submissions PRICAI covers a wide range of topics in the areas of social and economic importance for countries in the Pacific Rim artificial intelligence machine learning natural language processing knowledge representation and reasoning planning and scheduling computer vision distributed artificial intelligence search methodologies etc Part II includes two thematic blocks Natural Language Processing followed by Neural Networks and Deep Learning

NLP with Hugging Face Transformers Jason Brownlee, Muhammad Asad Iqbal Khan, 2025-05-14 Natural language processing has changed a lot recently due to the advances in language models In the past helping computers understand human language was a challenging task Some primitive techniques were used but they were not very effective It is because human language is complex and has many nuances This makes it difficult to model mathematically For example the probability model of language with a lot of exceptions would render it useless The recent advances in transformer based language models is not to assume anything about the language but to ask the computer to learn from the data In this way you will not get a mathematically clean model You cannot even write it down as equations But it works very well in practice The blossom of trendy new applications such as ChatGPT is an evidence of this Creating a transformer based language model is costly But using one is not There are a lot of open source language models available that you can use even on your own computer However you must know how to use them This includes to know what the model can do what format of data it can accept and what it will produce how to get the source code of the model and use it and how to load the model weights That s a lot of details This ebook gives you practical examples of how to use the most popular language models that a commodity computer can run This uses the Hugging Face Transformers library probably the simplest way to use the most popular language models The ebook is not a tutorial on the library nor how the language models work As an NLP practitioner neither of them is important The focus of this ebook is to give you practical examples on what the language models can do and how to use them for a variety of NLP tasks without knowing the detailed mechanisms behind them
