Young People and Thinking Technologies for the Anthropocene Peter Kraftl, Peter Kelly, Diego Carbajo Padilla, Rosalyn Black, Seth Brown, Anoop Nayak, 2022-09-26 This collection which is a companion volume to *Young People and Stories for the Anthropocene* Kelly et al 2022 aims to find to explore and to co produce ways of staying with the trouble Haraway 2016 that are disruptive of orthodoxies in childhood and youth studies and productive of new ways of thinking and of being and becoming in the circumstances that we young and old find ourselves in Circumstances that have problematically been identified as the Anthropocene and which have been characterised as being situated at the convergence of the climate crisis the 6th mass extinction and the ongoing crises of global capitalism as earth system Braidotti 2019 Moore 2015 The collection emerges in part and among other things around three key challenges First how can childhood and youth studies tell stories about the less obviously bounded obviously crafted obviously engineered material stuff that humans create and that circulates stuff like plastics chemicals and the scattered remnants of past industrial endeavour Second the need to experiment with diverse

modes of representation with differently mediated technologies and modes of telling that from digital film platforms to children's non-fiction writing expand our lexicon in terms of how it might become possible to narrate young people in and the Anthropocene Third the need to articulate different tools for working with young people in the Anthropocene Tools and technologies understood in this manner are modes of becoming attuned to and of making new configurations of human and non-human new and pressing threats that weigh upon young people in visceral affective ways and new modes of speculating about and becoming responsible for futures human and more than human In this sense the contributions to the collection from scholars from the Anglo and non-Anglosphere are framed by an urgency to develop and deploy innovative critical and disruptive theoretical and methodological tools and technologies to identify and explore the material temporal and conceptual challenges for children and young people and those who research in childhood and youth studies at this convergence

Routledge Handbook of the Sociology of Higher Education James E. Côté, Sarah Pickard, 2022-03-21 Higher education has come under increasing public scrutiny in recent years assailed with demands for greater efficiency accountability cost reduction and above all job training Drawing upon examples from across the world with an emphasis on Anglo American higher education systems this handbook employs sociological approaches to address these pressing concerns The second edition is thoroughly updated and adds several new chapters to shed further light on the transformations wrought by the interrelated processes of massification vocationalization and marketization that have swept through universities in the wake of neoliberal reforms introduced by governments since the 1980s The handbook explores recent developments in higher education systems and policy as well as the everyday experiences of students and staff and ongoing problems of inequality and diversity within universities In doing so the chapters address a number of current issues concerning the legitimacy of higher educational credentials from the continuing debate regarding traditional pedagogies and the role of universities in social class reproduction to more recent concerns about standards in mass systems Collectively this handbook demonstrates that the sociology of higher education has the potential to play a leadership role in improving the myriad higher education systems around the world that are now part of an interrelated set of subsystems replete with both persistent problems and promising prospects This book is therefore necessary reading for a variety of stakeholders within academia as well as professionals and policy makers interested in understanding higher education and the acute challenges it faces

Youth Development in Identity Societies James E. Cote, 2018-10-31 This book explores the causes and consequences of the contradictions in young people's lives stemming from the affluence purpose paradox a lack of purpose in life among many of those living in the most affluent societies in human history This paradox is endemic to identity societies where people experience a choice contingent life course and is examined using an interdisciplinary approach largely with an integration of developmental psychology and sociology but also using historical anthropological economic and political perspectives The transition to adulthood is now commonly a prolonged process with young people facing a number of psychological challenges and sociological obstacles in their identity formation Challenges include difficulties in making prudent choices about goals Obstacles involve cross pressures in the wider society as well as in educational institutions Consequently many youth experience their education as alienating and stressful rather than as an opportunity for personal development Those without a sense of purpose have more difficulties with their identity formation that can produce symptoms of anxiety and depression The current student mental health crisis is examined in this context An additional challenge is an ambiguously defined adulthood Young people who are confused about appropriate adult roles often

value hedonistic activities rooted in narcissism and materialism rather than in more fulfilling long term goals Conversely those who are agentic in their personal development can thrive in adulthood especially when they combine agency with generativity This book ends with a series of recommendations for researchers and policy makers to help youth cope with the affluence purpose paradox **Education Policy, Digital Disruption and the Future of Work** Shane B.

Collectively this rich and diverse edited volume builds on cross disciplinary frameworks and an attention to differences among mothers to analyze multiple ways that mothers and pregnant women face culture policy or practices that may criminalize their identities or their actions Several themes cross the volumes six chapters from the importance of and problems related to socialized expectations of what good mothers should do for incarcerated formerly incarcerated and never incarcerated mothers alike to the role of state actors and everyday informal interactions in enforcing these expectations particularly against marginalized Black Brown and young mothers in open air prisons Conflicts between motherhood ideologies and state control dominate many women under carceral motherhood Nation states are also implicated in these analyses particularly in the European Union where nation states outsource abortion across and within geopolitical borders making migration a contested strategy for pregnant women Yet despite the criminalizing of motherhood and reproduction described in the text women and mothers are also found to be resilient choosing their identities and their actions
