Woolf, Christina Silver, 2017-09-20 Software is cut and dried every button you press has a predictable effect but qualitative analysis is open ended and unfolds in unpredictable ways This contradiction is best resolved by separating analytic strategies what you plan to do from software tactics how you plan to do it Expert NVivo users have unconsciously learned to do this The Five Level QDA method unpacks the process so that you can learn it consciously and efficiently The first part of the book explains how the contradiction between analytic strategies and software tactics is reconciled by translating between them The second part provides both an in depth description of how NVivo works and comprehensive instruction in the five steps of translation These steps are illustrated with examples from a variety of research projects The third part contains real world qualitative research projects from a variety of disciplines methodologies and kinds of qualitative analysis all illustrated in NVivo using the Five Level QDA method The book is accompanied by three sets of video demonstrations on the companion website The book and accompanying videos illustrate the Windows version of NVivo As there are some differences in screen and interface design between the Mac and Windows versions please watch the video The NVivo Mac Interface in the Component Orientation series of videos available on the companion website The Five Level QDA method is based on the authors combined 40 years of experience teaching NVivo and other software packages used as platforms for conducting qualitative analysis After many years observing their students challenges they developed the Five Level QDA method to describe the process that long time NVivo experts unconsciously adopt The Five Level QDA method is independent of software program or methodology and the principles apply to any type of qualitative project Please see the following URL to access the accompanying materials for this book <https://www.qdaservices.co.uk/five-level-qda>      **Qualitative Data Analysis with NVivo** Patricia Bazeley, Kristi Jackson, 2013-05-29 Lecturers/instructors only request a free digital inspection copy here This straightforward jargon free book provides an invaluable introduction to planning and conducting qualitative data analysis with NVivo Written by leading authorities with over 40 years combined experience in computer assisted analysis of qualitative and mixed mode data the new edition of this best selling textbook is an ideal mix of practical instruction methodology and real world examples Practical clear and focused the book effectively shows how NVivo software can accommodate and assist analysis across a wide range of research questions data types perspectives and methodologies It sets out The power and flexibility of the NVivo software How best to use NVivo at each stage in your research project Examples from the authors own research and the sample data that accompanies the software supplemented with vignettes drawn from across the social sciences Annotated screen shots A website with links to data sample projects supplementary updated instructions and SAGE journal content This second edition contains new chapters on handling a literature review visualizing data working in mixed methods and social media datasets and approaching NVivo as a team An insightful step by step guide to the messy reality of doing computer assisted analysis this successful book is essential reading for anyone
