Abstract: An empirical investigation of the relationship between the size of the firm and the size of the board of directors. The results show that the size of the board of directors is positively related to the size of the firm. The relationship is stronger for firms with a higher degree of debt and for firms with a higher degree of industry concentration. The results also show that the size of the board of directors is positively related to the size of the firm. The relationship is stronger for firms with a higher degree of debt and for firms with a higher degree of industry concentration.
