Anamuah-Mensah, George Sefa Dei, Kolawole Raheem, 2014-07-11 There is no term so heavily contested in social science
literature nomenclature than Development This book brings Indigenous perspectives to African develop ment It is argued
that contrary to development as we know it not working a greater part of the problem is that conventional development
approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since
everything we do about our world is development So how come there is difficult knowledge when it comes to learning from
what we know i.e. what local peoples do and have done for centuries as a starting point to recon structing and reframing
development In getting our heads around this paradox we are tempted to ask more questions How do we as African scholars
and research ers begin to develop home grown solutions to our problems How do we pioneer new analytical systems for
understanding our communities and offer a pathway to genuine African development i.e. Indigenist African development see
