Guenter Lewy, 2016-06-01 Like every totalitarian regime Nazi Germany tried to control intellectual freedom by censoring books Between 1933 and 1945 the Hitler regime orchestrated a massive campaign to take control of all forms of communication In 1933 there were 90 book burnings in 70 German cities Indeed Werner Schlegel an official in the Ministry of Propaganda called the book burnings a symbol of the revolution In later years the regime used less violent means of domination It pillaged bookstores and libraries and prosecuted uncooperative publishers and dissident authors In *Harmful and Undesirable* Guenter Lewy analyzes the various strategies that the Nazis employed to enact censorship and the government officials who led the attack on a free intellectual life including Martin Bormann Philipp Bouhler Joseph Goebbels and Alfred Rosenberg The Propaganda Ministry played a leading role in the censorship campaign supported by an array of organizations at both the state and local levels Because of the many overlapping jurisdictions and organizations censorship was disorderly and erratic Beyond the implementation of censorship Lewy describes the plight of authors publishers and bookstores who clashed with the Nazi regime Some authors were imprisoned Others such as Gottfried Benn Werner Bergengruen Gerhart Hauptmann Ernst Jünger Jochen Klepper and Ernst Wiechert became controversial inner emigrants who chose to remain in Germany Some of them criticized the Nazi regime through allegories and parables Ultimately Lewy paints a fascinating portrait of intellectual life under the Nazi dictatorship detailing the dismal fate of those who were caught in the wheels of censorship

International Perspectives on Knowledge Integration Thomas Lehmann, 2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e.g. theoretical and practical or from different domains which together constitute a teacher's or

educational specialist s professional knowledge base e g content knowledge pedagogical knowledge pedagogical content knowledge knowledge about using technologies for learning and instruction etc Furthermore knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully In many countries however future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice Specifically it explores theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration It is thus of interest to researchers faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology
