Washington's Crossing Pivotal Moments In American History:

Washington's Crossing David Hackett Fischer, 2004-02-12 Six months after the Declaration of Independence the American Revolution was all but lost A powerful British force had routed the Americans at New York occupied three colonies and advanced within sight of Philadelphia Yet as David Hackett Fischer recounts in this riveting history George Washington and many other Americans refused to let the Revolution die On Christmas night as a howling nor easter struck the Delaware Valley he led his men across the river and attacked the exhausted Hessian garrison at Trenton killing or capturing nearly a thousand men A second battle of Trenton followed within days The Americans held off a counterattack by Lord Cornwallis's best troops then were almost trapped by the British force Under cover of night Washington's men stole behind the enemy and struck them again defeating a brigade at Princeton The British were badly shaken In twelve weeks of winter fighting their army suffered severe damage their hold on New Jersey was broken and their strategy was ruined Fischer's richly textured narrative reveals the crucial role of contingency in these events We see how the campaign unfolded in a sequence of difficult choices by many actors from generals to civilians on both sides While British and German forces remained rigid and hierarchical Americans evolved an open and flexible system that was fundamental to their success The startling success of Washington and his compatriots not only saved the faltering American Revolution but helped to give it new meaning

Strategists Break All The Rules Major Adelaido Godinez III, 2014-08-15 Emory Upton believed that politicians should leave war to professionals This led to two assumptions that became conventional wisdom first an apolitical army represented a more professional force and

second the problems at the tactical and operational level were similar enough to be useful in developing strategic thinking. These assumptions resulted in what Samuel P. Huntington described as the normal theory relationship between policy makers and generals. The assumption made sense for the United States but had one unfortunate result: The Army as an institution misread the nature of an apolitical force. The essence of an apolitical force should be non-partisan. Army professionals above political interference or interest. There is a difference, however, between policy and politics. While not involving itself in the political life of the nation, the Army is vitally concerned with the policies of the nation. The discussion strategists must prepare for are political but in the nature of policy as the object of war. A historical survey of strategists from General Winfield Scott to General Creighton Abrams suggests that the most successful strategists are life-long learners. They build holistic understanding of the interdependent and infinite connections of the whole problem. Once they develop a hypothesis about the whole problem, they reshape those connections to create a better peace for the United States. Strategists that take time to understand the whole problem encourage discourse. Retaining the Functional Area 59 Strategist program will continue to benefit the force because they do not follow a traditional route to generalship. After all, few have earned stars by arguing, debating, and taking intellectual risk.
