Grigg, 2016-10-25 This book addresses the enormous global challenge of providing balanced and sustainable solutions to urgent water problems. The author explores our dependence on access to safe water and other water related services and how driving forces of the human and natural worlds are degrading this access. The greatest challenges involve conflicts between people and interest groups across all countries as well as the economic and political difficulties in finding solutions through infrastructure development. The book takes an interdisciplinary approach to Integrated Water Resources Management or IWRM which provides a set of tools for policy development, planning and organization, assessment, systems analysis, finance and regulation. The author suggests that IWRM is challenging because of the human element but that no other process can reconcile the conflicting agendas involved with water management. The broad range of topics covered here as well as 25 case summaries will be of interest to scientists, engineers, practitioners and advanced level students interested in the integrated management of water as a resource. Public Infrastructure Asset Management, Second Edition Waheed

Uddin, W. Ronald Hudson, Ralph C.G. Haas, 2013-07-30 The book has been thoroughly revised to reflect the impact of built infrastructure on the environment, social concerns, new technologies and scientific developments and the impacts of natural and man-made disasters. **Making Healthy Places, Second Edition** Nisha Botchwey, 2022-07-12 Making Healthy Places surveys the many intersections between health and the built environment from the scale of buildings to the scale of metro areas and across a range of outcomes from cardiovascular health and infectious disease to social connectedness and happiness. This new edition is significantly updated with a special emphasis on equity and sustainability and takes a global perspective. It provides current evidence not only on how poorly designed places may threaten well-being but also on solutions that have been found to be effective. Making Healthy Places is a must-read for students, academics and professionals in health, architecture, urban planning, civil engineering, parks and recreation and related fields. Nickum, Raya Marina Stephan, 2023-05-22 This book contributes to the debate about the suitability and challenges of the Smart Water Management SWM approach Smart Water Management has increasingly been promoted to manage water and wastewater more efficiently and cost effectively by industries and utilities in urban contexts at regional or city scales while reducing overall consumption It is based on the use of Information and Communication Technology ICT to provide real time automated data to resolve water challenges Many of these technologies are complex and costly however and the approach tends to overlook cheaper and less high tech softer approaches to address the same problems Yet there may be opportunities

for using them even in resource short rural communities in developing countries The book includes examples of SWM systems in practice in diverse locations from Korea Mexico Paris the Canary Islands and southern Africa aimed at addressing a diverse set of problems including monitoring water supply to refugees Critical voices highlight the need for smart institutions to accompany smart technologies the absurdity of applying SWM to dysfunctional legacy infrastructure systems whether its adoption raises moral hazards and whether SWM is the latest example of hegemonic masculinity in water management The chapters in this book were originally published in Water International **Proceedings of the Canadian Society of Civil Engineering Annual Conference 2021** Scott Walbridge,Mazdak Nik-Bakht,Kelvin Tsun Wai Ng,Manas Shome,M.
