sixteen narratives that address the experiences of Gulf Coast residents faculty and graduate students who were caught up in the largest not so natural disaster in United States history Each contributor deploys storytelling sociology as a methodological approach in order to illustrate how personal experiences with disaster are not so personal but rather reflect and are informed by larger social phenomena related to issues including race class gender age bureaucracy risk collective memory the blas and more The narratives in this volume exemplify how inequality and injustice are unveiled exacerbated and created by the occurrence of disaster and reveal the sociological in everyday and not so everyday experiences **Hurricane Katrina and the Redefinition of Landscape** DeMond Shondell Miller,Jason David Rivera,2009-01-01 Miller and Rivera explore how the fundamental changes to the physical landscape after Hurricane Katrina set the stage for dramatic changes to come for the city and region and how these changes altered the economic cultural and political lives of the survivors

Hurricane Katrina Charles River Charles River Editors,2017-12-20 Includes pictures Includes accounts of the hurricane written by survivors Includes a bibliography for further reading The big lesson I learned from Hurricane Katrina is that we have to be thinking about the unthinkable because sometimes the unthinkable happens Mike Leavitt Hurricanes have been devastating communities for thousands of years bringing about various combinations of rain and wind that can do everything from taking down some dead limbs to wiping out houses They are also common enough that people who live for any length of time in a region prone to having hurricanes are inclined to accept them as something of a periodic nuisance rather than a serious danger Modern construction styles allow houses to withstand winds in excess of 100 miles an hour and early warning systems allow people to evacuate Thus most hurricanes of the 21st century take fewer lives than a serious highway accident As a result the world watched in horror as Hurricane Katrina decimated New Orleans in August 2005 and the calamity seemed all the worse because many felt that technology had advanced far enough to prevent such tragedies whether through advanced warning or engineering Spawning off the Bahamian coast that month Katrina quickly grew to be one of the deadliest natural disasters in American history killing more than 1 800 people and flooding a heavy majority of one of America s most famous cities At first the storm seemed to be harmless scooting across the Floridian coast as a barely noticeable Category 1 storm but when Katrina reached the warm waters of the Gulf of Mexico its winds grew exponentially before slamming into the southern Louisiana coast as a massive Category 5 hurricane In addition to the deadly nature of the hurricane it was also incredibly destructive as a result of failed levees around the New Orleans area By the time the storm had passed it had wreaked an estimated 108 billion of damage across the region and the human suffering with nearly 2 000 deaths and a million people displaced was available for viewing across the world Naturally the reactions of political leaders would be heavily scrutinized in the aftermath and people studied the lessons to be learned from the disaster to prevent a similar occurrence in the future Hurricane Katrina The Story of the Most Destructive Hurricane in American History chronicles the storm from its formation to the devastating effects it had across the Gulf of Mexico Along with pictures and a

Richardson, 2019-05-07 The government's response to Hurricane Katrina one of the most devastating natural disasters in U S history suffered numerous criticisms Nearly every assessment pointed to failure from evaluations of President George W Bush FEMA and the Department of Homeland Security to the state of Louisiana and the city administration of New Orleans In *Managing Hurricane Katrina Lessons from a Megacrisis* Arjen Boin Christer Brown and James A Richardson deliver a more nuanced examination of the storm's aftermath than the ones anchored in public memory and identify aspects of management that offer more positive examples of leadership than bureaucratic and media reports indicated Katrina may be the most extensively studied disaster to date but the authors argue that many academic conclusions are inaccurate or contradictory when examined in concert Drawing on insights from crisis and disaster management studies

Boin Brown and Richardson apply a clear framework to objectively analyze the actions of various officials and organizations during and after Katrina They specify critical factors that determine the successes and failures of a societal response to catastrophes and demonstrate how to utilize their framework in future superdisasters Going beyond previous assessments Managing Hurricane Katrina reconsiders the role of government in both preparing for a megacrisis and building an effective response network at a time when citizens need it most **Voices from the Storm** Lola Vollen,Chris Ying,2015-10-01

Hurricane Katrina inflicted damage on a scale unprecedented in American history nearly destroying a major city and killing thousands of its citizens With far too little help from indifferent incompetent government agencies the poor bore the brunt of the disaster The residents of traditionally impoverished and minority communities suffered incalculable losses and endured unimaginable conditions And the few facilities that did exist to help victims quickly became miserable dangerous places Now the victims of Hurricane Katrina find themselves spread across the United States far from the homes they left and faced with the prospect of starting anew Families are struggling to secure jobs homes schools and a sense of place in unfamiliar surroundings Meanwhile the rebuilding of their former home remains frustrating out of their hands This bracing read brings readers to the heart of the disaster and its aftermath as those who survived it speak with candor and eloquence of their lives then and now **The Great Deluge** Douglas Brinkley,2009-10-13 When Hurricane Katrina hit the Gulf Coast writer

Douglas Brinkley was forced to evacuate his home along with scores of his fellow New Orleans residents Now the New York Times best selling author of The Boys of Pointe du Hoc and Tour of Duty tells the complete tale of the terrible storm Through detailed research and interviews with survivors Brinkley investigates the failure of government at every level to manage this devastating tragedy He also explains the political social and economic factors that led to the breakdown of the New Orleans levee system particularly how the Mississippi Gulf Coast was never properly rebuilt after Hurricane Camille in 1969 Douglas Brinkley is professor of history and director of the Theodore Roosevelt Center at Tulane University Four of his books have been selected as New York Times Notable Books of the Year His last three historical narratives Tour of Duty The Boys of Pointe du Hoc and Parish Priest were all New York Times best sellers A contributing editor to Vanity Fair and American Heritage he lives in New Orleans with his wife Anne and their two children Benton and Johnny its thick detail provides a ground level view of human behavior far richer than the breathless news reports that stunned and shamed the nation in the summer of 2005 New York Times Book Review **Hurricane Katrina in Transatlantic Perspective** Romain Huret,Randy

J. Sparks,2014-12-15 There is no such thing as a natural disaster writes Romain Huret in his introduction to this multidisciplinary study of the events surrounding and the legacy of Hurricane Katrina Though nature produced Katrina s rising waters and destructive winds a vast array of manmade factors shaped the scope of the storm s impact as well as the local and national response to it In Hurricane Katrina in Transatlantic Perspective American and European scholars approach this infamous storm and its aftermath through a variety of disciplines from music to geography to anthropology creating a

nuanced understanding of how society reacts to and later remembers times of disaster Richard Campanella and Romain Huret examine the particular geographical and political mix that set the stage for Katrina's devastation especially among the poorest populations of New Orleans and the Gulf South Jean Kempf James Boyden Andrew Diamond and Thomas Jessen Adams address the ideological biases and racial stereotypes that infused local and national commentary in the days and weeks after the storm Finally Bruce Raeburn Sara Le Menestrel Anne M Lovell and Randy J Sparks explore the impact of this powerful tropical event on the city's institutions and cultural organizations Hurricane Katrina in Transatlantic Perspective offers a profound and innovative collection of insights on one of the most significant environmental catastrophes in U S history forcing us to examine the cultural actors that transformed a natural disaster into a humanitarian crisis
