Lectures on the Causes and Treatment of Ulcers of the Lower Extremity. Delivered at the London Hospital ... 1848 George CRITCHETT, 1849

Lower Extremity Wounds Karen Ousey, Caroline McIntosh, 2008-04-30 Lower limb wounds are frequently observed in clinical practice and often present a real challenge for health care practitioners Lower extremity wound care requires a

multidisciplinary approach involving a number of different health care professionals in order to achieve optimum patient care. Nurses and podiatrists in particular are frequently involved in the assessment and management of lower extremity wounds, often working in partnership. **Lower Extremity Wounds**: A problem based learning approach is the first wound care book that has been written as a joint venture by experienced nurses and podiatrists, all with expert knowledge in wound care. It highlights the importance of multi professional collaboration to encourage the crossing and dismantling of professional boundaries to increase understanding of each other's roles and ultimately to ensure that the patient receives the best available evidence based interventions during their health care journey. Taking a problem based learning approach, each of the ten chapters highlights best practice in the management of wounds by type, discusses clinical guidelines and current evidence, and links this theory to a clinical scenario, thus bridging the theory to practice gap. Numerous full colour illustrations are used throughout the book to visually enhance the reader's learning. Aimed at both students and practitioners, this book is essential reading for anyone involved in lower extremity wound care.
