market concentration **Private and Public Sectors** Karl Wohlmuth, 2004 The African Development Perspectives Yearbook series fills a gap in the literature on Africa's development problems. Experts from African institutions and regional organisations from international organisations from universities and research institutions from governmental and non governmental organisations and from the donor community analyse issues and report on problems and solutions on new policies programmes projections and visions and on new and ongoing projects in and for Africa. Various levels of action that are relevant for Africa's development are considered in this Yearbook: the international community in its relation to Africa interregional and national issues of Africa's development but also local projects and local development achievements are documented. Africa's development perspectives are therefore analysed and commented from the global to the local space by presenting analytical surveys and policy statements declarations and programmes of international regional national and voluntary organisations. It is also the purpose of the African Development Perspectives Yearbook to establish a news and information network a forum for international communication on Africa's development perspectives. This tenth volume presents analyses policy oriented papers development projections and proposals for reforms with regard to the role of public and private sectors in Africa. The balance between private and public sector development in Africa is challenging due to a rapidly changing international environment in the era of globalisation. It discusses the role of the private sector the functions of the private sector institutions the state of the privatisation programmes and the importance of a strengthening of public policies public infrastructures and public institutions in Africa.
