Tiefel, 2024-03-11 *Christian Ethics Introduced* asks why humans count as ends in themselves The biblical answer was is that humans have standing inherent worth as creatures in the image of God This traditional answer yielded to seventeenth and eighteenth century enlightenment secularism To these secularists human reason promised to be a surer and more peaceable foundation for a just culture than religion Human rationality the light of human reason would enlighten and improve the human condition Two world wars and more realistic trends in new social sciences created not just awareness of human irrationality but fostered skepticism of sound foundations for morality and justice It seemed that both traditional religion and enlightened reason fell short of what had been hoped And the cause of failure may not lie in traditional religion or in human irrationality Rather the problem might lie in human conduct Specifically it may lie in the human inclination to favor self over others of the me outranking the we Christian responses to the human failure to live a moral and just life recognize the persistence of immoral conduct acknowledge it in regard to oneself ask for forgiveness and make amends and peace with God and with those wronged *Evangelical Review of Theology, Volume 46, Number 3, August 2022* Thomas Schirmacher, 2022-08-25 ERT publishes quality articles and book reviews from around the world both original and reprinted from an evangelical perspective reflecting global evangelical scholarship for the purpose of discerning the obedience of faith and of relevance and importance to its international readership of theologians educators church leaders missionaries administrators and students The journal is published as a ministry rather than as a commercial project seeking to be of service to the worldwide spread of the gospel and the building up of the church and its leadership in coordination with the World Evangelical Alliance s broader mission and activities [Religious Education and the Public Sphere](#) Patricia Hannam, 2018-08-06 *Religious Education and the Public Sphere* reveals through an analysis of theory and practice that religious education is resting on historic and persistent assumptions about both religion and education Drawing on work from Arendt and Weil new ideas emerge regarding religious education s constituent elements education and religion

It offers a new and timely proposal for religious education and argues for a broader understanding of religion bringing a fresh contribution to current discussions regarding the relationship between religion and education in the public sphere Some practical considerations emerging from theory developing through the earlier parts of the book are presented in the final section including the teacher's role and what should guide religious education curriculum At a time when there is raised interest in the role of religion in the public sphere internationally this book aims to contribute something new both theoretically and practically to discussions regarding the role of religion in education is and relevant to educational contexts worldwide This book will be vital reading for academics and researchers in the fields of religion and religious studies education philosophy of education and religious education and will also be of great interest to teachers and policy makers working in the field of religious education in the public sphere
