analysis using corpus linguistics What research questions should I ask Which methods should you use and when What is a collocational network or a key cluster Introducing the major techniques methods and tools for corpus assisted analysis of discourse this book answers these questions and more showing readers how to best use corpora in their analyses of discourse Using carefully tailored case studies each chapter is devoted to a central technique including frequency concordancing and keywords going step by step through the process of applying different analytical procedures Introducing a wide range of different corpora from holiday brochures to political debates the book considers the key debates and latest advances in the field Fully revised and updated this new edition includes A new chapter on how to conduct research projects in corpus based discourse analysis Completely rewritten chapters on collocation and advanced techniques using a corpus of jihadist propaganda texts and covering topics such as social media and visual analysis Coverage of major tools including CQPweb AntConc Sketch Engine and LancsBox Discussion of newer techniques including the derivation of lockwords and the comparison of multiple data sets for diachronic analysis With exercises discussion questions and suggested further readings in each chapter this book is an excellent guide to using corpus linguistics techniques to carry out discourse analysis

Using Corpora to Analyze Gender Paul Baker, 2014-01-02 Corpus linguistics uses specialist software to identify linguistic patterns in large computerised collections of text patterns which then must be interpreted and explained by human researchers This book critically explores how corpus linguistics techniques can help analysis of language and gender by conducting a number of case studies on topics which include directives in spoken conversations changes in sexist and non sexist language use over time personal adverts press representation of gay men and the ways that boys and girls are

constructed through language The book thus covers both gendered usage e g how do males and females use language differently or not from each other and gendered representations e g in what ways are males and females written or spoken about Additionally the book shows ways that readers can either explore their own hypotheses or approach the corpus from a naive position letting the data drive their analysis from the outset The book covers a range of techniques and measures including frequencies keywords collocations dispersion word sketches downsizing and triangulation all in an accessible style

Corpora and Discourse Alan Partington, John Morley, Louann Haarman, 2004 Corpus linguistics has made impressive strides in the fields of lexicography and grammatical description but has had relatively little to say as yet in describing features of discourse This volume then examines how it is possible to use concordance technology and the detailed linguistic evidence available in corpora to enhance the study of among other things how speakers writers organise their discourse how they express evaluation of their topics and the rhetorical strategies they employ to persuade an audience Particular attention is paid to interrogating specialized corpora and to devising techniques to discover what is going on between speakers and between authors and readers in particular varieties of the language These studies reveal the value of integrating corpus techniques with other non automatic methods of research into the linguistic record and of combining quantitative and qualitative approaches In general they show how it is possible to use corpora to analyse discourse not only as product but also as process

Using Corpora to Learn about Language and Discourse Linda Lombardo, 2009 Considerable progress has been made in the use of corpora for research purposes to describe language in use and more recently through a CADS corpus assisted discourse studies approach to identify the discourse features of specific text genres While the potential benefits of working with corpora in the classroom have been recognised there has been a lag in the promulgation of guidelines for carrying out meaningful corpus work with language learners and teachers in mind The papers in this volume aim to make a contribution toward filling that gap by providing an in depth account of innovative corpus work most of which has actually been carried out with real learners in the classroom Authors provide valuable insights into ways of structuring corpus work for specific target learners as well as suggestions for resolving problematic issues that have arisen and avoiding errors that have been made with learners and in their own research and experimentation The transparency and honesty with which they present their methodology and results along with the successful techniques they have developed constitute a step forward in defining good and bad practice in the use of corpora in learning

Corpora and Discourse Studies Anthony McEnery, Paul Baker, 2015-07-21 This edited collection brings together contemporary research that uses corpus linguistics to carry out discourse analysis The book takes an inclusive view of the meaning of discourse covering different text types or modes of language including discourse as both social practice and as ideology or representation

Discourse Patterns in Spoken and Written Corpora Karin Aijmer, Anna-Brita Stenström, 2004-01-01 This book brings together a number of empirical studies that use corpora to study discourse patterns in speech and writing It explores new trends in the area of text and

discourse characterized by the alliance between text linguistics and areas such as corpus linguistics genre analysis literary stylistics and cross linguistic studies The contributions to the volume show how established corpora can be used to ask a number of new questions about the interface between speech and writing the relation between grammar and discourse academic discourse cohesive markers stylistic devices such as metaphor deixis and non verbal communication The corpora used for text analysis can also be tailor made for the study of particular genres such as journal article abstracts lectures e mailing list messages headlines and titles A recent development is to bring in contrastive data from bilingual corpora to show what is language specific in the organization of the text
