Waking Tiger Peter A Levine:

Waking the Tiger: Healing Trauma Peter A. Levine, Ph.D., 2025-05-27 Now in 24 languages Nature's Lessons in Healing Trauma Waking the Tiger offers a new and hopeful vision of trauma It views the human animal as a unique being endowed with an instinctual capacity It asks and answers an intriguing question why are animals in the wild though threatened routinely rarely traumatized By understanding the dynamics that make wild animals virtually immune to traumatic symptoms the mystery of human trauma is revealed Waking the Tiger normalizes the symptoms of trauma and the steps needed to heal them People are often traumatized by seemingly ordinary experiences The reader is taken on a guided tour of the subtle yet powerful impulses that govern our responses to overwhelming life events To do this it employs a series of exercises that help us focus on bodily sensations Through heightened awareness of these sensations trauma can be healed *In an Unspoken Voice* Peter A. Levine, Ph.D., 2012-10-30 Unraveling trauma in the body brain and mind a revolution in treatment Now in 17 languages In this culmination of his life's work Peter A Levine draws on his broad experience as a clinician a student of comparative brain research a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body brain and psyche In an Unspoken Voice is based on the idea that trauma is neither a disease nor a disorder but rather an injury caused by fright helplessness and loss that can be healed by engaging our innate capacity to self regulate high states of arousal and intense emotions Enriched with a coherent theoretical framework and compelling case examples the book elegantly blends the latest findings in biology neuroscience and body oriented psychotherapy to show that when we bring together animal instinct and reason we can become more whole human beings

The Spiritual Anatomy of Emotion Michael A. Jawer, 2009-05-21 A cutting edge examination of feelings not thoughts as the gateway to understanding consciousness Contends that emotion is the greatest influence on personality development Offers a new perspective on immunity stress and psychosomatic conditions Explains how emotion is key to understanding out of body experience apparitions and other anomalous perceptions Contemporary science holds that the brain rules the body and generates all our feelings and perceptions Michael Jawer and Dr Marc Micozzi disagree They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives The less consciousness we have of our emotional being the more physical disturbances we are likely to have from ailments such as migraines fibromyalgia chronic fatigue and post traumatic stress to anomalous perceptions such as apparitions and involuntary out of body experiences Using the latest scientific research on immunity sensation stress cognition and emotional expression the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why They explain that emotion is a portal into the world of extraordinary perception and they provide the studies that validate the science behind telepathic dreams poltergeists and ESP The Spiritual Anatomy of Emotion challenges the prevailing belief that the brain must necessarily rule the body Far from being by products of neurochemistry

the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing and perennially baffling experiences

Could Have Done Stephen Torr, 2025-08-19 In a world that is becoming more aware of the impact of traumatic experiences on the lives of individuals the church is faced with the challenge of examining how to do life well together in a way that helps rather than hinders those who are living in the aftermath of trauma Beginning with the question of what Job's friends could have done differently to help Job in the midst of his suffering the present work draws on Kevin Vanhoozer's theodramatic model and the Object Relations Theory of British pediatrician and psychoanalyst Donald Winnicott to provide biblically rooted guidance for developing a trauma sensitive church In bringing these perspectives together exploration takes place into what it means to be made in the image of God in the theodrama and what the church's role is in enabling the christological form of this image to take shape in each individual particularly in the aftermath of individual trauma The work of Winnicott provides fresh insight into how this development might be facilitated by the church within the theodrama of salvation **Healing**

Trauma and Memory Peter A. Levine, Ph.D., 2015-10-27 Designed for psychotherapists and their clients Peter Levine's latest best seller continues his groundbreaking exploration of the central role of the body in processing and healing trauma With foreword by Bessel van der Kolk author of The Body Keeps the Score In Trauma and Memory bestselling author Dr Peter Levine creator of the Somatic Experiencing approach tackles one of the most difficult and controversial questions of PTSD trauma therapy Can we trust our memories While some argue that traumatic memories are unreliable and not useful others insist that we absolutely must rely on memory to make sense of past experience Building on his 45 years of successful treatment of trauma and utilizing case studies from his own practice Dr Levine suggests that there are elements of truth in both camps While acknowledging that memory can be trusted he argues that the only truly useful memories are those that might initially seem to be the least reliable memories stored in the body and not necessarily accessible by our conscious mind While much work has been done in the field of trauma studies to address explicit traumatic memories in the brain such as intrusive thoughts or flashbacks much less attention has been paid to how the body itself stores implicit memory and how much of what we think of as memory actually comes to us through our often unconsciously accessed felt sense By learning how to better understand this complex interplay of past and present brain and body we can adjust our relationship to past trauma and move into a more balanced relaxed state of being Written for trauma sufferers as well as mental health care practitioners Trauma and Memory is a groundbreaking look at how memory is constructed and how influential memories are on our present state of being Symposium, 2007 (Stan Tatkin), 2025-06-11
