book will appeal to anyone who loves history food and especially good cheese Behind every traditional type of cheese there is a fascinating story By examining the role of the cheesemaker throughout world history and by understanding a few basic principles of cheese science and technology we can see how different cheeses have been shaped by and tailored to their surrounding environment as well as defined by their social and cultural context Cheese and Culture endeavors to advance our appreciation of cheese origins by viewing human history through the eyes of a cheese scientist There is also a larger story to be told a grand narrative that binds all cheeses together into a single history that started with the discovery of cheese making and that is still unfolding to this day This book reconstructs that 9000 year story based on the often fragmentary information that we have available Cheese and Culture embarks on a journey that begins in the Neolithic Age and winds its way through the ensuing centuries to the present This tour through cheese history intersects with some of the pivotal periods in human prehistory and ancient classical medieval renaissance and modern history that have shaped western civilization for these periods also shaped the lives of cheesemakers and the diverse cheeses that they developed The book offers a useful lens through which to view our twenty first century attitudes toward cheese that we have inherited from our past and our attitudes about the food system more broadly I love this book accessible in its prose and style with the breadth and depth of an academic work Paul Kindstedt has produced a seminal work in Cheese and Culture Mateo Kehler cheesemaker Jasper Hill Farm This book will fascinate anyone who loves cheese With a sweeping perspective from the earliest prehistoric domestication of goats and sheep to the present it chronicles how social technological and political developments gave rise to the vast array of cheeses we know and love Sandor Ellix Katz author of The Art of Fermentation and Wild Fermentation
