Policing the Banks Maartje Van Putten,2011-05-01 Describing how formerly secretive financial institutions have been slow to accept responsibility for the consequences of their investments especially the problems that can result from projects in developing countries she shows that financing institutions can cause significant social and environmental damage and argues that new accountability mechanisms are necessary to reduce or prevent such damage Because such institutions operate on a global scale only semi judicial accounting mechanisms can provide the necessary accountability It is time for the private financial sector to follow multilateral financial institutions in creating independent mechanisms mediation procedures and access to decision makers for people harmed or potentially harmed by projects financed by their institutions

The World Bank Group A to Z World Bank Group,2014-09-30 The World Bank Group A to Z provides ready reference insight into the history mission organization policies financial services and knowledge products of the world s largest anti poverty institution

Transboundary Waters, Infrastructure Development and Public Private Partnership Richard Kyle Paisley,Riley T. Denoon,Theressa Etmanski,Patrick Weiler,2017-11-06 Public Private Partnerships PPPs have increasingly emerged as a valuable mechanism for drawing in investment and expertise from the private sector to meet public infrastructure needs PPPs involving transboundary international waters require particular attention given their huge potential for social and environmental impact *Transboundary Waters Infrastructure Development and Public Private Partnership* examines what

PPPs are and how they function in the context of transboundary waters It explains how environmental and social safeguards operate in relation to PPPs and transboundary waters in light of the Nam Theun 2 and the Xayaburi Hydroelectric Power projects in Laos PDR Finally it draws important lessons from their contractual arrangements costs financing and risk mitigation that are relevant to PPPs in other transboundary waters matters

Ecohydrology in a Changing Environment Shavkat Kenjabaev,2014-11-25 The complex of ecological problems in Central Asia especially in Uzbekistan is linked to rapid ongoing demographic and economic processes However geographical location has its own peculiarity Aridity of the climate in Uzbekistan makes water resources as main limiting factor for sustainable economic development Chub et al 1998 RECCA 2011 Annual precipitation ranging from 80 200 mm in plain to 300 400 mm in foothills and 600 800 mm in mountain rangelands Chub 2007 is considerably lower than the evaporation demand of atmosphere FAO IPTRID et al 2004 Thus agriculture accounting about 90% withdrawal of total available water resources in Uzbekistan is impossible without irrigation Qadir et al 2009 Moreover agricultural production is highly vulnerable to climate change Lioubimtseva Henebry 2009 High fluctuation of precipitation and temperature increase may influence land use in irrigated lands create difficulties in water management at regional and local scales and increase competition of scarce water resources among water users in various sectors

Energy Abstracts for Policy Analysis ,1989 **Urbanization and the Environment in Developing Countries** ,1990 **Enhancing Participation and Governance in Water Resources Management** Libor Jansky,Juha I. Uitto,2005 The United Nations estimates that more than 2 billion people in over 40 countries are negatively affected by water shortages Increasing demand for water has been identified as one of four major factors that will threaten human and ecological health over the next generation As public health development economy and nature suffer ensuring access to clean water is rising towards the top of government agendas Water resources management is the aggregate of policies and activities used to provide clean water to meet human needs across sectors and jurisdictions and to sustain the water related ecological systems upon which we depend Knowledge that is crucial for water management is distributed across governments non governmental organizations and the water users themselves In most circumstances water management aims to address the interests of and integrate usage across hydrologically meaningful units such as watersheds Some management aspects however such as transboundary flows across multiple basins and inter basin water transfers via channels or virtual water may necessitate a broader geographical scope Public participation aims actively to increase attention to and inclusion of the interests of those who are usually marginalized e g politically disenfranchised minorities or poor people indirectly affected by water management In this book the authors identify successful mechanisms approaches and practices for promoting public involvement in water resources management including both conventional approaches and those based on information technology

Planning for Resilient Small and Medium-Sized Cities in Ghana Stephen Kofi Diko,Seth Asare Okyere,Stephen Leonard Mensah,Louis Kusi Frimpong,2025-09-10 Planning for Resilient Small and

Medium Sized Cities in Ghana explores the resilience and planning dynamics and complexities of rapid urban transitions in Ghana's small and medium sized cities (SMCs) and their implications for Africa and the Global South. The book argues that Ghana's urban future may have more to do with the steady growth of SMCs where urban consolidation is gradually taking a foothold. Recognizing that Ghana's primary cities are well known to be socio-ecological hotspots of risk, reactive urban planning and entrenched inequalities of alarming proportions, this book asks: would SMCs follow these troubling realities and trajectories in large cities or leapfrog to resilient futures that work for all? Through a range of interdisciplinary perspectives, the contributions emphasize the need for integrated planning strategies to navigate socio-ecological challenges and opportunities that SMCs face in terms of infrastructure, governance and climate resilience. By centering overlooked and understudied SMCs in Ghana's urban scholarship, this book realigns resilience planning to the spaces and places emerging as the frontiers of socio-ecological crises. It will be of interest to students and researchers of city and regional planning, urban studies, geography, environmental studies and science, public policy, development studies and public health, as well as urban planners, community development practitioners, geographers, environmental disaster and resilient personnel and policymakers.

Drinking Water Quality Management from Catchment to Consumer Bob Breach, 2011-10-04. Part of Water Quality Set. Buy all four books and save over 30% on buying separately. *Drinking Water Quality Management from Catchment to Consumer* is a best practice book that builds on the experience of water suppliers and experts across the world in order to provide a practical guide to help utilities improve the management of drinking water quality. It is based on the Water Safety Plan approach and the principles of the Bonn Charter for Safe Drinking Water and is intended to complement and support other relevant publications, particularly the WHO Water Safety Plan Manual. It has evolved from the work of The Bonn Network, which is a global group of water suppliers originally established to develop and share best practice in drinking water quality management based on the Bonn Charter. The emphasis is on practical information by operators for operators, learning from the experience of a range of water suppliers across the world. The book supports and encourages users to think through the best way for them to improve drinking water quality management, taking account of local factors. It recognises that whilst water suppliers are central to the provision of good drinking water, this has to take place within a broader legal, institutional and financial framework which is the responsibility of Government and others. It thus highlights the ways that water suppliers can work with a range of partners to ensure that all are committed to the same goal of good, safe drinking water. *Drinking Water Quality Management from Catchment to Consumer* is an essential reference for water quality laboratory and operational managers from water utilities around the world. It is also helpful to consultants working in this area and regulatory, health and municipal and catchment management authorities. The book is of interest to academics working in the field of drinking water quality and risk management and may be used on any courses aimed at managing drinking water quality. **Sustainable Justice** Marie-Claire Cordonier Segger, C.G. Mining and the Environment Karlheinz Spitz,John Trudinger,2019-08-20 The history of mining is replete with controversy of which much is related to environmental damage

and consequent community outrage Over recent decades this has led to increased pressure to improve the environmental and social performance of mining operations particularly in developing countries The industry has responded by embracing the ideals of sustainability and corporate social responsibility Mining and the Environment identifies and discusses the wide range of social and environmental issues pertaining to mining with particular reference to mining in developing countries from where many of the project examples and case studies have been selected Following an introductory overview of pressing issues the book illustrates how environmental and social impact assessment such as defined in The Equator Principles integrates with the mining lifecycle and how environmental and social management aims to eliminate the negative and accentuate the positive mining impacts Practical approaches are provided for managing issues ranging from land acquisition and resettlement of Indigenous peoples to the technical aspects of acid rock drainage and mine waste management Moreover thorough analyses of ways and means of sharing non transitory mining benefits with host communities are presented to allow mining to provide sustainable benefits for the affected communities This second edition of Mining and the Environment includes new chapters on Health Impact Assessment Biodiversity and Gender Issues all of which have become more important since the first edition appeared a decade ago The wide coverage of issues and the many real life case studies make this practice oriented book a reference and key reading It is intended for environmental consultants engineers regulators and operators in the field and for students to use as a course textbook As much of the matter applies to the extractive industries as a whole it will also serve environmental professionals in the oil and gas industries Karlheinz Spitz and John Trudinger both have multiple years of experience in the assessment of mining projects around the world The combination of their expertise and knowledge about social economic and environmental performance of mining and mine waste management has resulted in this in depth coverage of the requirements for responsible and sustainable mining

The United Nations Convention on the Law of International Watercourses Attila Tanzi, Maurizio Arcari, 2021-11-29 Problems relating to the non navigational uses of international watercourses have the capacity to be among the most serious causes of international conflicts in the new century The Convention adopted by the UN General Assembly on 21 May 1997 is the first comprehensive attempt to provide at the universal level a coherent set of rules for the avoidance management and settlement of such conflicts This book gives a brief history of the codification process leading to the adoption of the Convention and considers the conflicting approaches to the subject that have been taken over the years It examines the Convention as future treaty law and considers its impact on customary law putting it in the context of existing relevant international instruments It analyses the substantive principles of equitable utilisation and of no harm on the one hand and the procedural obligations on the other and emphasises their mutual complementarity The specific rules on the environmental protection of watercourses are given separate consideration underlining the indivisibility of water quality and water quantity issues while the dispute settlement provisions set out in the Convention are studied with special emphasis on

negotiated settlement as their ultimate aim This book will be a compulsory tool for law makers negotiators of future watercourse agreements and water law practitioners as well as a required reading for students of the international law of shared natural resources
