The Craft of Editing Michael Alley,2013-03-08 You are a hired gun of sorts a manager scientist or engineer called upon to edit a document Perhaps you are overseeing a long report or thesis reviewing a journal article or providing comments on a proposal For the document before you what changes do you suggest How do you clearly and efficiently communicate those changes to the author How do you convince the author and the other editors that those changes are needed The answers to these questions define how you edit someone s writing In business engineering and science the process of editing causes much strife In fact my experience in teaching professional writing over the past fifteen years has been that editing is the number one complaint that professionals have about the process of documenting their work Many professionals complain that this editing seems to arise more from whim than from logic that what flies in one document is often shot down in another Others complain that editors change too much essentially inserting their own individual styles Still others complain that the sign off process is so inefficient and taxing that they sometimes do not document work they know should be documented While in many cases these complaints are unfounded in many others they are legitimate This book addresses those complaints that are legitimate by showing managers scientists and engineers how to make their editing both more effective and more efficient

African Appropriations Matthias Krings,2015-07-20 This exploration of African adaptations of global pop culture is a genuinely innovative book unlike most others in either anthropology or African studies American Ethnologist Why would a Hollywood film become a Nigerian video remake a Tanzanian comic book or a Congolese music video Matthias Krings explores the myriad ways Africans respond to the relentless onslaught of global culture He seeks out places where they have adapted pervasive cultural forms to their own purposes as photo novels comic books songs posters and even scam letters These African appropriations reveal the broad scope of cultural mediation that is characteristic of our hyperlinked age Krings argues that there is no longer an original or faithful copy but only endless transformations that thrive in the fertile ground of African popular culture The text is jargon free a pleasure to read remarkably well researched and enriched by 40 illustrations Highly recommended Choice
