Modern Buddhist and Christian Mysticism Charles M. Mueller, Peter Richardson, 2025-03-01 Investigations of mysticism often focus on the past while largely ignoring current developments. This book contributes to a reversal of that trend with a rigorous examination of a wide selection of contemporary Buddhist and Christian authors. The focus is on the intriguing intersections and subtle divergences now emerging in areas such as ineffability, nonconceptuality, paradox, inverted agency, unity, and self-dissolution. The analysis combines the theoretical framework of Cognitive Linguistics with a range of methodological approaches from discourse and thematic analysis to corpus linguistics. Wide-ranging, systematic, and informative, the book is invaluable to all of those interested in the phenomenon of mysticism within the modern world.

Cognitive Linguistic Approaches to Text and Discourse Hart, Christopher Hart, 2019-05-15 Drawing on a range of text genres including novels, poems, health forums, holiday guestbooks, prayers, political songs, and news stories, each chapter uses cognitive linguistics to shed light on the meanings and meaning-making processes invoked when we encounter texts belonging to different literary and political genres. The book presents new insights into the workings of textual phenomena such as metaphor, viewpoint, and deixis, and also sheds light on more elusive epiphenomenal qualities such as a text's ambience, atmosphere, power, ideology, or persuasiveness. It also takes new strides in cognitive text analysis by exploiting experimental and ethnographic methods to empirically investigate readers' reception of and resistance to texts.

Advances in Cultural Linguistics Farzad Sharifian, 2017-05-02 This groundbreaking collection represents the broad scope of cutting-edge research in Cultural Linguistics, a burgeoning field of interdisciplinary inquiry into the relationships between language and cultural cognition. The materials surveyed in its chapters demonstrate how cultural conceptualisations encoded in language relate to all aspects of human life, from emotion and embodiment to kinship, religion, marriage, and politics, even the understanding of life and death. Cultural Linguistics draws on cognitive science, complexity science, and distributed cognition among other disciplines to strengthen its theoretical and analytical base. The tools it has developed have worked toward insightful investigations into the cultural grounding of language in numerous applied domains, including World Englishes, cross-cultural, intercultural pragmatics, intercultural communication, Teaching English as an International Language (TEIL), and political discourse analysis.

Figuring out Figuration María Sandra Peña-Cervel, Francisco José Ruiz de Mendoza Ibáñez, 2022-05-15 This book combines explanatory breadth with analytical delicacy. It offers a comprehensive study of a broad array of traditional figures of speech by systematizing linguistic evidence of the cognitive processes underlying them. Such processes are explicitly linked to different communicative consequences, thus bringing together pragmatics and cognition. This type of study has allowed the authors to provide new definitions for all the figures while making their dependency relations fully explicit. For example, hypallage, antonomasia, anthimeria, and merism are studied as variants of metonymy, and analogy, paragon, and allegory as variants of metaphor. An important feature of the book is its special emphasis on the combinations of figures of speech into conceptually more complex configurations. Finally,

the book accounts for the principles that regulate the felicity of figurative expressions The result is a broad integrative framework for the analysis of figurative language grounded in the relationship between pragmatics and cognition
