Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an

appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it. Rather than fear the challenges that new technology brings to systems of learning, the editors hope to help instructors embrace it by rethinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning.

Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment, pedagogical issues, curriculum design, psychological and group dynamics, and ethical issues. Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments. The book draws heavily on personal case examples, many from The Fielding Graduate Institute's 26 years of teaching in nontraditional distributed learning environments.

Re-reading / La relecture Rachel Falconer, Andrew Oliver, 2012-03-15

What happens when we re-read a familiar book? Does the second encounter turn us into experts, more knowing and confident in our relation to the text? Or conversely does it expose the gaps and limits of each reading experience? Does re-reading affirm our own sense of identity, reconnecting us to earlier memories, or does it shock and destabilize, revealing discontinuities between past and present selves? Is re-reading uncanny, a discovery of the familiar in the unfamiliar, or the reverse? Do certain literary devices and tropes, symbols, allegories, for example, depend on re-reading to be activated? Are there some texts that can only be re-read? Re-reading is rarely discussed in depth, yet it forms the core of most conversations about literature, for we rarely become passionate or critical about books we have only read once. It is also re-reading that consolidates a core of texts into what we recognise to be a canon of literature, and it is re-reading again that breaks open the canon and reshapes it. We re-read alone, but we also re-read communally, in the shared space of the theatre, or in the translation of a text from one culture to another, or one medium to another. Re-reading is a necessary part of the professional reader's life, yet there is often in the history of the individual scholar some formative relationship with a text read obsessively in childhood. This bilingual volume of essays brings together an international group of eminent scholars in order to reflect on this process of re-reading in honour of Graham Falconer, Professor of 19th century French literature and long-term re-reader. The essays vary from personal reflections on formative childhood reading and self-reflexive scholarly re-readings to analysis of the theme of re-reading in texts and presentation of new theories of re-reading. Gustave Flaubert, Honoré de Balzac, Stendhal, Eugène Fromentin, Guy de Maupassant, Marcel Proust, Samuel Beckett, Dostoevsky, Mikhail Bakhtin, W.B. Yeats, William Blake, Roland Petit, H.G. Wells, and Anthony Hope are amongst the authors re-visited in these reflections on the practice of re-reading.

Profit and Prejudice Paul Donovan, 2020-11-05

Avoiding prejudice will be critical to economic success in the fourth industrial revolution. It is not the new and innovative technology that will matter in the next decade, but what we do with it. Using technology properly with diverse decision-making is the difference between success and failure in a changing world. This will require putting the right person in the right job at the right time. Prejudice stops that happening. *Profit and Prejudice* takes us through the relationship between economic

success and prejudice in labour markets It starts with the major changes that occur in periods of economic upheaval These changes tend to be unpopular and complex and complexity encourages people to turn to the simplistic arguments of scapegoat economics and prejudice Some of the changes of the fourth industrial revolution will help fight prejudice but some will make it far worse The more prejudice there is the harder it will be for companies and countries to profit from the changes ahead Profit is not the main argument against prejudice but can certainly help fight it This book tells a story of the damage that prejudice can do Using economics without jargon students investors and the public will be able to follow the narrative and see how prejudice can be opposed Prejudice is bad for business and the economy Profit and Prejudice explains why

Formational Children's Ministry (ēmerſion: Emergent Village resources for communities of faith) Ivy Beckwith, 2010-01-01 Much ministry to

children looks more like mere entertainment than authentic spiritual formation. But what if children's ministries were rooted in a mind set whereby we taught children with our words and actions how the story of God, the story of church history, the story of the local community and the story of the child intersect and speak to one another? What if children's ministry was less about downloading information into kids' heads and more about leading them into these powerful compelling stories? Beckwith aims to help ministers and parents create a ministry that captures children's imaginations not just to keep them occupied but to live as citizens of the kingdom of God. In addition to providing theological reasons for formational children's ministry, the book offers examples of how Ivy and other practitioners are implementing a formational model.
