Where To Find Textbooks Online:

Online by Design Yvonne Mery, Jill Newby, 2014-04-23 As more and more academic libraries consider offering online credit courses or converting face to face courses to online instructional librarians need to quickly get up to speed about online course design and delivery Even the most seasoned instruction librarian may be intimidated by the thought of converting their classroom course into an online course Based on both sound research in the area on of online pedagogy and extensive teaching experience this book includes ideas for Creating innovative and interactive information literacy tutorials that engage students Addressing common pitfalls of online instruction including communicating with students designing a course that is easy to navigate and getting the most out of the course management system Developing assignments and assessments that work in an online environment Incorporating the ACRL Information Literacy Competency Standards for Higher Education into the materials development process A must for both seasoned instruction librarians and those just starting this book will provide librarians with the practical information needed to move their instruction online and teach a successful course

Books in the Digital Age John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution What is the role of the book in an age preoccupied with computers and the internet How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future This is the first major study of the book publishing industry in Britain and the United States for more than two decades Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems challenges and opportunities faced by publishing firms today He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century It will be of great interest to students taking courses in the sociology of culture media and cultural studies and publishing It will also be of great value to professionals in the publishing industry educators and policy makers and to anyone interested in books and their future

Academic Textbook Trends Mason Ross, AI, 2025-02-20. *Academic Textbook Trends* explores the evolving world of educational resources in higher education, moving beyond traditional models. It examines how instructors and students adapt to digital learning, the rise of open educational resources (OER), and the impact of cost on student access. This academic textbook uniquely analyzes the shift in adoption patterns, pricing sensitivities, and the integration of digital learning platforms like learning management systems (LMS). For example, the book looks at how the increasing costs of traditional textbooks are pushing students and faculty toward more affordable learning solutions such as e-books and courseware. The book approaches the topic by blending quantitative data from publisher reports and student surveys with qualitative insights from faculty interviews. It delves into specific areas such as textbook adoption across disciplines and the impact of OER initiatives. The book progresses logically, beginning with an introduction that sets the stage, followed by chapters analyzing data and concluding with implications for the future of textbook development. This makes *Academic Textbook Trends* valuable for educators, administrators, and publishers seeking to enhance learning outcomes and ensure equitable access to educational materials in a rapidly changing landscape.
