issues *Globalization: Perak's Rise, Relative Decline, and Regeneration* Sultan Nazrin Shah, 2024 Written by Sultan Nazrin Shah the author of the highly acclaimed works *Charting the Economy* and *Striving for Inclusive Development* this book is a pioneering study of the many economic and social changes in the natural resource rich Malaysian state of Perak over the last two centuries When globalization first took hold and international trade networks broadened and deepened in the first half of the 19th century and a new capitalist world order emerged in the second Perak was a key player Its tin was in high demand in Western industrializing countries and foreign capital labour and technology propelled it forward By 1900 Perak accounted for almost half of Malaya's tin output and a staggering quarter of world output with its prosperity making it the Malay peninsula's commercial hub Likewise during the global rubber boom that began in the early 20th century as cars were mass produced for the first time Perak was the largest rubber producing state in the peninsula This book brings together a range of key sub themes economic geography the institutional legacy of colonialism increasing federal government centralization forces of economic agglomeration and human migration which drove Perak's fortunes in sometimes dramatic economic cycles and ultimately led to the collapse of its tin and rubber industries and the migration of many of its young and skilled The book concludes by looking forward analysing Perak's characteristics and extrapolating lessons from formerly wealthy industrial centres originally blessed with natural resources but subsequently left behind by new waves of globalization such as Cornwall and Sheffield in the United Kingdom and Pittsburgh and Scranton in the United States With a new vision Perak can regenerate itself and once again emerge triumphant against a tough global background Covid 19 war and deglobalization

Indian Cotton Textiles in West Africa Kazuo Kobayashi, 2019-06-10 This book focuses on the significant role of West African consumers in the development of the global economy It explores their demand for Indian cotton textiles and how their consumption shaped patterns of global trade influencing economies and businesses from Western Europe to South Asia In turn the book examines how cotton textile production in southern India responded to this demand Through this perspective of a south south economic history the study foregrounds African agency and considers the lasting impact on production and exports in South Asia It also considers how European commercial and imperial expansion provided a complex web of networks linking West African consumers and Indian weavers Crucially it demonstrates the emergence of the modern global economy

Possessive Individualism Daniel W. Bromley, 2019 Daniel Bromley offers a fundamental critique of contemporary capitalism to explain why the world now finds itself in widespread disorder The basic flaw he argues is the triumph of a culture of possessive individualism As a result capitalism is no longer an engine of improved livelihoods and social hope Bromley explains that escape from this disorder requires that the private firm be reimaged as a public trust whose purpose is to offer plausible livelihoods as it also serves our acquisitive wants However the possessive individual also bears urgent responsibilities We must renew the idea of loyalty to others whether neighbors fellow workers or society at large *Explorations in History and Globalization* Cátia Antunes, Karwan Fatah-Black, 2016-04-14 Considering the ways in

which the global turn is changing the theory and practice of historical disciplines Explorations in History and Globalization engages with the concept and methodology of globalization challenging traditional divisions of space and time to offer a range of perspectives on how globalization has affected social economic political and cultural history Each chapter covers a specific theme discussing how globalization has shaped these themes and how they have contributed to globalization throughout history Including topics such as ecological exchanges trade exchanges of knowledge migration empire and urbanization this volume both explains historical trajectories through a global analytical framework and provides tools that students can employ when posing their own research questions about historical globalization Containing suggestions for further reading and guidance on the ways in which primary source material can be used as a basis for global historical studies this is the ideal volume for all students interested in the global exchanges between people throughout history

American Capitalism Sven Beckert, Christine Desan, 2018-02-06 The United States has long epitomized capitalism From its enterprising shopkeepers wildcat banks violent slave plantations huge industrial working class and raucous commodities trade to its world spanning multinationals its massive factories and the centripetal power of New York in the world of finance America has come to symbolize capitalism for two centuries and more But an understanding of the history of American capitalism is as elusive as it is urgent What does it mean to make capitalism a subject of historical inquiry What is its potential across multiple disciplines alongside different methodologies and in a range of geographic and chronological settings And how does a focus on capitalism change our understanding of American history American Capitalism presents a sampling of cutting edge research from prominent scholars These broad minded and rigorous essays venture new angles on finance debt and credit women s rights slavery and political economy the racialization of capitalism labor beyond industrial wage workers and the production of knowledge including the idea of the economy among other topics Together the essays suggest emerging themes in the field a fascination with capitalism as it is made by political authority how it is claimed and contested by participants how it spreads across the globe and how it can be reconceptualized without being universalized A major statement for a wide open field this book demonstrates the breadth and scope of the work that the history of capitalism can provoke

International Economics, Second Edition Paul Torelli, 2017-05-23 Today s news media displays an intense fascination with the global economy and for good reason The degree of worldwide economic integration is unprecedented Rising globalization has lifted living standards and reduced poverty while foreign markets and new technologies continue to present opportunities for entrepreneurs and corporations Still economic shocks can spread across the world in minutes impacting billions of lives The political framework supporting globalization is now under scrutiny and recent elections suggest economic policies may be readjusted in the coming years This book will help you learn about economics in everyday language using little or no math giving you better tools to interpret current events as well as long term economic and political developments Modern economics offers a powerful framework for understanding globalization

international trade and economic growth You may possess years of hands on experience dealing with business cycles and foreign competitive pressures but lack a solid grounding in economic concepts that shed light on the forces of globalization This book is here to help **The Spread of Modern Industry to the Periphery Since 1871** Kevin H. O'Rourke, Jeffrey G. Williamson, 2017 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Ever since the Industrial Revolution of the late eighteenth and early nineteenth centuries industrialization has been the key to modern economic growth The fact that modern industry originated in Britain and spread initially to north western Europe and North America implied a dramatic divergence in living standards between the industrial North or West and a non industrial or even de industrializing South or Rest This nineteenth century divergence which had profound economic military and geopolitical implications has been studied in great detail by many economists and historians Today this divergence between the West and the Rest is visibly unraveling as economies in Asia Latin America and even sub Saharan Africa converge on the rich economies of Europe and North America This phenomenon which is set to define the twenty first century both economically and politically has also been the subject of a considerable amount of research Less appreciated however are the deep historical roots of this convergence process and in particular of the spread of modern industry to the global periphery This volume fills this gap by providing a systematic comparative historical account of the spread of modern manufacturing beyond its traditional heartland to Southern and Eastern Europe the Middle East Asia Africa and Latin America or what we call the poor periphery It identifies the timing of this convergence finding that this was fastest in the interwar and post World War II years not the more recent miracle growth years It also identifies which driving forces were common to all periphery countries and which were not
