A Dictionary of the Economic Products of India: Linum to Oyster Sir George Watt, 1891 **Richard Wright's Native Son**, 2007-01-01 Coinciding with the preparations for the celebration in 2008 of Richard Wright's 100th birthday this new collection of critical essays on *Native Son* attests to the importance and endurance of Wright's controversial work. The eleven essays collected in this volume engage the objective of Rodopi's Dialogue Series by creating multidirectional conversations in which senior and younger scholars interact with each other and with previous scholars who have weighed in on the novel's import. Speaking from distant corners of the world, the contributors to this book reflect an international interest in Wright's unique combination of literary strategies and social aims. The wide range of approaches to *Native Son* is presented in five thematic sections. The first three sections cover aspects such as the historical reception of Wright's novel, the inscription of sex and gender both in *Native Son* and in other African American texts, and the influence of Africa and of vortical symbolism on Wright's aesthetics. Following is the study of the novel from the point of view of its adoption and transformation of various literary genres: the African American jeremiad, the protest novel, the crime novel, and courtroom drama, the Bildungsroman, and the Biblical modes of narration. The closing section analyzes the novel's lasting influence through its adaptation to other artistic fields such as the cinema and song in the form of hip hop. The present volume may therefore be of interest for students who are not very familiar with Wright's classic text as well as for scholars and Richard Wright specialists.

A Bibliography of Historical Economics to 1980 Deirdre N. McCloskey, George K. Hersh, Jr., 1990. Historians and economists will find here what their fields have in common: the movement since the 1950s known variously as cliometrics, economic history, or historical economics. A leading figure in the movement, Donald McCloskey, has compiled, with the help of George Hersh and a panel of distinguished advisors, a highly comprehensive bibliography of historical economics covering the period up until 1980. The book will be useful to all economic historians as well as quantitative historians, applied economists, historical demographers, business historians, national income accountants, and social historians.

Monthly Labor Review United States. Bureau of Labor Statistics, 1999. Publishes in depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

Black Americans and Organized Labor Paul D. Moreno, 2008. In *Black Americans and Organized Labor*, Paul D. Moreno offers a bold reinterpretation of the role of race and racial discrimination in the American labor movement. Moreno applies insights of the law and economics movement to formulate a powerfully compelling labor-race theorem of elegant simplicity. White unionists found that race was a convenient basis on which to do what unions do: control the labor supply. Not racism, pure and simple, but the economics of discrimination explains historic black absence and underrepresentation in unions. Moreno's sweeping reexamination stretches from the antebellum period to the present, integrating principal figures such as Frederick Douglass and Samuel Gompers, Isaac Myers and Booker T. Washington and W. E. B. Du Bois and A. Philip Randolph. He traces changing attitudes and practices during the

simultaneous black migration to the North and consolidation of organized labor's power through the confusing and conflicted post World War II period during the course of the civil rights movement and into the era of affirmative action. Maneuvering across a wide span of time and a broad array of issues, Moreno brings remarkable clarity to the question of the importance of race in unions. He impressively weaves together labor policy and African American history into a cogent persuasive revisionist study that cannot be ignored.

Between Caravan and Sultan: The Bayruk of Southern Morocco Mohamed Hassan Mohamed, 2012-02-22 This work presents a study of the history and identity of the Moroccan Bayruk family. The first part of the book gives an outline of the main referents in both the Bayruk vision of self and academic discourses on Maghribian history, the dynasty, caravan, and tribe. It identifies discrepancies in scholarly presentations of the Bayruk and traces them back to two overlapping issues of translation and conception. For the remainder of the book, a variety of sources are used to highlight the role of textuality in the creation of the Bayruk image in academic discourse. As a result, this book demonstrates how the Bayruk family can be used as a case study to revise the existing interpretations of Maghribian history and modes of identification.

Strategic Factors in Nineteenth Century American Economic History Claudia Goldin, Hugh Rockoff, 2008-04-15 Offering new research on strategic factors in the development of the nineteenth century American economy, labor, capital, and political structure, the contributors to this volume employ a methodology innovated by Robert W. Fogel, one of the leading pioneers of the new economic history. Fogel's work is distinguished by the application of economic theory and large scale quantitative evidence to long standing historical questions. These sixteen essays reveal, by example, the continuing vitality of Fogel's approach. The authors use an astonishing variety of data, including genealogies, the U.S. federal population census, manuscripts, manumission and probate records, firm accounts, farmers' account books, and slave narratives, to address collectively market integration and its impact on the lives of Americans. The evolution of markets in agricultural and manufacturing labor is considered first, that concerning capital and credit follows. The demography of free and slave populations is the subject of the third section, and the final group of papers examines the extra-market institutions of governments and unions.

A Different Vision Thomas D. Boston, 2002-01-04 This work brings together for the first time the ideas, philosophies, and interpretations of North America's leading African American economists, demonstrating that racial inequality has had an immense impact on African Americans' daily lives.
