physicians turned to pharmacists more and more for drug information especially within institutional settings And today s patient care pharmacists are taking more interests in medication review and reconciliation patient education and counseling creating drug therapy regimen and monitoring compliance The purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals The contents are mostly based on recently published articles related to patient care with most recent ideas and activities followed by the patient care pharmacists around the globe However a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver Along with professional guidelines the book discusses the concepts and best practices of patient interaction patient rights and ethical decision making for the professional pharmacist apprentice and student In every chapter the role of pharmacists in that chapter specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do s and don t s in that specific situation Moreover further reading references are listed as future recommendations So the book is an archive of potential references too Among so many books about patient care either doctors or nurses roles are highlighted The proposed book highlights the pharmacists roles and responsibilities to the most separated from those of doctors and nurses with the most recent information obtained from most publications in several journals books bulletins newsletter magazines etc

Intelligent Systems for Sustainable Person-Centered Healthcare Dalia Kriksciuniene, Virgilijus Sakalauskas, 2022-02-17 This open access book establishes a dialog among the medical and intelligent system domains for igniting transition toward a sustainable and cost effective healthcare The Person Centered Care PCC positions a person in the center of a healthcare system instead of defining a patient as a set of diagnoses and treatment episodes The PCC based conceptual background triggers enhanced application of Artificial Intelligence as it dissolves the limits of processing traditional medical data records clinical tests and surveys Enhanced knowledge for diagnosing treatment and rehabilitation is captured and utilized by inclusion of data sources characterizing personal lifestyle and health literacy and it involves insights derived from smart ambience and wearables data community networks and the caregivers feedback The book discusses intelligent systems and their applications for healthcare data analysis decision making and process design tasks The measurement systems and efficiency evaluation models analyze ability of intelligent healthcare system to monitor person health and improving quality of life

Embedded Pharmacists in Primary Care George E. MacKinnon III, Nathan Lamberton, 2021-06-08 As healthcare delivery moves from a provider centric approach to a more patient centric approach systems and payers need to reimagine how care and team based care is delivered to patients and reimbursed Thus the goal should be to see the right patient by the right provider in the right place for the right price and where appropriate with the use of the right pharmaceutical s 5 P s There continues to be a reduction in physicians that are pursuing primary care roles in the United States thus exacerbating the ability to meet patient demand Most patient encounters begin with or end with the prescribing of medication Thus a future where

pharmacists are embedded in primary care settings allows these pharmacists to collaborate at the point of prescribing i.e. in clinic and provides tremendous benefits to providers and patients The pharmacist workforce is educated at the doctoral level yet vastly underutilized and can assist in a collaborative approach in primary care The collection of articles in the Special Issue Embedded Pharmacists in Primary Care highlight examples of models that have included pharmacists in the ambulatory setting providing services in chronic disease management comprehensive medication management and care of specific conditions such as diabetes
