Tourism and Sustainable Development Goals Jarkko Saarinen, 2020-06-29 This comprehensive volume comprises some of the best scholarship on sustainable tourism in recent years demonstrating the rich body of past research that provides a fertile and critical ground for studies on the Sustainable Development Goals SDGs by tourism geographers and other social scientists in the future Since the turn of the 1990s many international development and policy making organisations have perceived the tourism industry with its local and regional connections as a high potential tool for putting sustainable development into practice The capacity of tourism to work for

sustainable development was highlighted in relation to the United Nations SDGs which were adopted in 2015. The SDGs define the agenda for global development to 2030 by addressing pertinent challenges such as poverty, inequality, climate change, environmental degradation, and peace and justice. Tourism geographers and allied disciplines have held strong and long-term interest in sustainability issues, and their chapters in this collection contribute significantly to this emerging and highly policy-relevant research field. This book was originally published as an online special issue of the journal *Tourism Geographies*. *Education for Sustainability in Tourism* Gianna Moscardo, Pierre Benckendorff, 2015-10-21. Sustainability is a dominant theme in tourism practice. Increasingly, research and education of tourism stakeholders is also necessary in improving sustainable tourism practice. This book pays systematic attention to education for sustainability in tourism and is thus a valuable resource for sustainable tourism educators and scholars. The book is divided into four parts. Part I provides a reference for educators seeking to understand core knowledge areas: ethics, corporate social responsibility, and governance. Part II examines issues and processes relevant to understanding tourism and sustainability in the formal educational sector, including universities, vocational training, and school settings. Part III explores learning and sustainable tourism in non-institutional settings, including destination communities, coaching, and mentoring, and visitor learning. The final part provides a collection of cases to illustrate the use of different pedagogies and assessment approaches in education for sustainability in tourism. The book will be accompanied by instructor resources to assist educators teaching in the field. *The Practice of Sustainable Tourism* Michael Hughes, David Weaver, Christof Pforr, 2015-06-19. Sustainable tourism is a widely used term that has accumulated considerable attention from researchers and policy makers over the past two decades. However, there is still an apparently wide gap between theory and practice in the area. Recent scholarly research has tended to focus on niche areas of alternative tourism rather than address the broader issues and vagaries and paradoxes that appear to plague the broader notion of sustainable tourism. As such, there is a need for a new and pragmatic analysis of sustainable tourism as an overarching idea and how this manifests in practice. *The Practice of Sustainable Tourism* fulfils this need by offering a fresh perspective on sustainable tourism as an umbrella concept with inherent tensions. It presents a way of thinking about tourism based on the notion of finding common ground using the dialectic tradition of philosophy. Dialectics focusses on resolving opposing viewpoints by recognising they have common elements that can be combined into a rational and practical solution over time. As part of this approach, the book examines the strongly apparent tensions within alternative tourism as well as the paradox of continuing growth and other mass tourism-related issues. It is divided into three parts. Part I includes chapters discussing the general concept of sustainable tourism, its history, current status, and possible futures. Part II includes a range of destination case studies exploring how sustainable tourism has been applied, and Part III includes perspectives from the tourism operator view. Given the international content and challenging themes, the book will be appealing internationally to students, researchers, and academics in the fields of tourism, geography, sustainability, and social science.
