Mba,2019-06-29 This book focuses on the restructuring of distressed businesses emphasizing the need for new financing during the restructuring process as well as during relaunch and examines the role of law in encouraging creditor confidence and incentivizing lending It describes two broad approaches to encouraging new finance during restructuring a prescriptive one that seeks to attract credit using expressly defined

statutory incentives and a market based one that relies on the business judgment of lenders against the backdrop of transaction avoidance rules. Securing new financing for a distressed business is a critical part of successful restructuring. Without such financing the business may be unable to meet interim liquidity constraints or to implement its restructuring plans. This book addresses related questions concerning the place of new financing as an essential component of restructuring. In general terms the book explores how statutory interventions and the courts can provide support with contentious issues that arise from the provision of new financing whether through new financing agreements or through distressed debt investors who are increasingly gaining prominence as sources of new financing for distressed businesses. It argues that courts play a key part in preventing or correcting the imbalances that can arise from the participation of distressed debt investors. In this context it critically examines the distressed debt market in emerging markets like Nigeria and the opportunity presented by non performing loans arguing that the regulatory pattern of market entry may disincentivize distressed debt investing in a market that is in dire need of financing. The book offers a fresh and comparative perspective on restructuring new financing for distressed businesses by comparing various approaches primarily from the US, UK and Germany and drawing lessons for frontier markets with particular reference to Nigeria. It fills an important gap in international comparative scholarship and discusses a living problem with both empirical and policy aspects.

Banking Bailout Law Virág Blazsek, 2020-10-27. Setting forth the building blocks of banking bailout law this book reconstructs a regulatory framework that might better serve countries during future crisis situations. It builds upon recent carefully selected case studies from the US, the EU, the UK, Spain and Hungary to answer the questions of what went wrong with the bank bailouts in the EU, why the US performed better in terms of crisis management and how bailouts could be regulated and conducted more successfully in the future. Employing a comparative methodology it examines the different bailout and bank resolution techniques and tools and identifies the pros and cons of the different legal and regulatory options and their underlying principles. In the post 2008 legal regulatory architecture financial institution specific insolvency proceedings were further developed or implemented on both sides of the Atlantic. Ten years after the most recent financial crisis there is sufficient empirical evidence to evaluate the outcomes of the bank bailouts in the US and the EU and to examine a number of cases under the EU's new bank resolution regime. This book will be of interest of anyone in the field of finance, banking, central banking, monetary policy and insolvency law.
