Unitra Forms For Application:

New Forms of Work Organization in Europe Peter Grootings, Bjørn Gustavsen, Lajos Hächthy, A remarkable development in the sociology of work in recent years has been the explosion of brilliant cross national and cross cultural studies in Europe examining the conditions of labor against the background of different economic systems and differences within each of the major free market mixed welfare and planned economic systems that dot the European landscape In Vienna and Budapest in particular a group of intellectual workers have gotten together for what can only be described as breakthrough studies in the conditions and purposes of work in post industrial society The question of new forms of work organization focuses on job satisfaction participatory democracy in the work place levels of productivity and issues of health and safety in the occupational environment That these elements are important have long been known But what this collection of studies emphasizes is the specific mix that produced specific outcomes It does not shy away from dangerous and tough questions worker control and control of workers political participation in contexts of authoritarian regimes and personal rewards in contexts that once frowned upon private acquisition of capital The volume is rich in empirical studies and draws the theoretical implications that can and already have had vast policy consequences for workers in the modern context Issues relating to job rotation enrichment enlargement and autonomy and others related to new forms of organization starting with the shop floor and extending throughout the management of the enterprise as a whole are dealt with candidly The social character of labor long frowned upon as a mechanism for evading bread and butter issues is now recognized East and West as a dimension of concern that is growing precisely as the size and character of the labor sector is diminishing This is must reading for those interested in new forms of social and policy synthesis and ways of meliorating competing claims of different sectors in modern societies

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He

argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Rather, durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions. This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly.

Technological Innovation, Modernity, and Electric Goods in Late State Socialist Poland Patryk Wasiak, 2023-12-15 Technological Innovation, Modernity and Electric Goods in Late State Socialist Poland deconstructs the public performance of technological innovation and imagined modernity in relation to the home technologies market in late state socialist Poland. While doing so, Patryk Wasiak sheds light on the politics that accompanied the modes of representations of the new innovative consumer technologies in the public sphere and the agenda of actors who performed such representations. This book argues that the central form of the mediation of home technologies was the projection of specific sociotechnical imaginaries that included visions of how these technologies would have an impact on the creation of a desirable future social order and economy. Later, such imaginaries were re-negotiated and challenged as infeasible or undesirable. The author demonstrates how expert groups, the industry lobby, research institutes, and non-governmental organizations attempted to secure their role as intermediary actors in order to have a tangible impact on not only the production of commodities but more importantly on the definition of which commodity or a product feature is modern and innovative and which is obsolete.

Ntsikelelo's Dream Catcher Ntsikelelo Goodman Ndesi, 2020-01-01 This is an inspirational true story extolling the power of a dream. The perception of the world with its endless possibilities. Regardless of the circumstances and the challenges, honest living accomplishes the truest, most well-deserved victory. Identification of self-worth is key to a peaceful approach to life and perseverance, and the practise of patience can prove to be very rewarding. Time rewards those in the presence of the future.

South African Urban Change Three Decades After Apartheid Anthony Lemon, Ronnie Donaldson, Gustav Visser, 2021-06-10 This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure, and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa, and one that cannot be reduced to a singular statement, so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies vary greatly from city to city. As such, this book is a great resource to students and academics.

focused on urban change in South African cities since the demise of apartheid and scholars of urban policy making in South Africa and Southern urbanists generally
