

UNIT 3 - Water Study Guide -KEY

1.) Vocabulary:

Infiltration - the movement of surface water into rock or soil through cracks and pore spaces.

Bed Load - the part of a stream's load of solid material that is made up of sediment too large to be carried in suspension.

Delta - an accumulation of sediment formed where a stream enters a lake or ocean

Divide - an imaginary line that separates the drainage basin of one stream from another

Porosity - the percentage of the total amount of rock or soil that consists of pore space.

Permeability - a material's ability to release a fluid.

Sinkhole - a depression produced in a region where groundwater has removed soluble rock.

Artesian Well - any formation in which groundwater rises on its own under pressure

Well - a hole bored into the zone of saturation

Transpiration - plants absorb water and release it into the atmosphere

Capacity - the maximum load a stream can carry

Floodplain - the side-to-side cutting of a stream eventually producing a flat valley floor

2.) Where/How do springs form? Naturally flowing ground water reaches the surface of the Earth

3.) What is a major cause of floods? Rapid spring melting of snow, heavy rainfall over a long time

4.) How do caverns form? Hollowed out by erosion from underground streams

5.) What is the base level of a stream? The bottom level of a stream where it flows into another, larger body of water

6.) What is the gradient of a stream? The slope of a stream

7.) Which US river has the largest drainage basin? Mississippi

8.) How are sinkholes formed? Area where ground water has removed the rock

9.) How are geysers formed? A hot spring where water shoots out intermittently due to a build up of pressure under the ground

10.) How is the water cycle balanced? Explain. The amount of water in the air from evaporation and transpiration equals the amount of water that condenses and falls back to Earth as precipitation

11.) What is the discharge of a stream? How does it increase? How much water a stream can move in one second over a certain distance; increase speed or depth of the stream

12.) A steep gradient causes the discharge to be _____, increased

13.) What are the different types of loads that a stream can carry? Solution – stuff that's dissolved in the water; suspension – stuff that's floating in the water; scooting/rolling – stuff that's pushed/rolled along the bottom due to the movement of the water

14.) Explain a drainage basin. Land area that contributes water to a stream/river; we are in the Yadkin/Pee-Dee river basin

15.) Where do you find groundwater? Groundwater is found beneath the Earth's surface in soil pore spaces and in the fractures of rock formations.

Label each number in the diagram below.

1. solar radiation
2. condensation

Water System Science and Policy Interfacing Philippe Quevauviller,2010 Recent discussions among scientists and policy makers have highlighted that knowledge generated by many research and demonstration projects is not reaching policymakers in an efficient way Conversely the consideration of research results by the policy making community is not straightforward and difficulties arise in integrating the latest research developments in legislation The difficulty is enhanced by the fact that the policy making community is not defining its role as client sufficiently well and the dialogue and communication channels are far from ideal to ensure an efficient flow of information An increasing number of experts consider that improvements could be achieved through the development of a science policy interface so that R D results are synthesised in a way to efficiently feed policy implementation and that short medium and long term research needs may be identified This book examines the issue of integrating science into policy with an emphasis on water system knowledge and related policies An important feature of the book is the discussion of science policy interfacing needs illustrated by examples from authors from different countries in

relation to water system management This publication is timely in that the science policy interfacing is now identified as a key challenge worldwide with regard to integrated water resource management and therefore the book will be of great interest to scientists water managers and stakeholders Readers will also benefit from a better understanding of the needs benefits and drawbacks of an established transfer mechanism of scientific outputs to policies *CISSP (ISC)2 Certified Information Systems Security Professional Official Study Guide* James Michael Stewart, Mike Chapple, Darril Gibson, 2015-09-11 NOTE The exam this book covered CISSP Certified Information Systems Security Professional was retired by ISC 2 in 2018 and is no longer offered For coverage of the current exam ISC 2 CISSP Certified Information Systems Security Professional please look for the latest edition of this guide ISC 2 CISSP Certified Information Systems Security Professional Official Study Guide Eighth Edition 9781119475934 CISSP Study Guide fully updated for the 2015 CISSP Body of Knowledge CISSP ISC 2 Certified Information Systems Security Professional Official Study Guide 7th Edition has been completely updated for the latest 2015 CISSP Body of Knowledge This bestselling Sybex study guide covers 100% of all exam objectives You ll prepare for the exam smarter and faster with Sybex thanks to expert content real world examples advice on passing each section of the exam access to the Sybex online interactive learning environment and much more Reinforce what you ve learned with key topic exam essentials and chapter review questions Along with the book you also get access to Sybex s superior online interactive learning environment that includes Four unique 250 question practice exams to help you identify where you need to study more Get more than 90 percent of the answers correct and you re ready to take the certification exam More than 650 Electronic Flashcards to reinforce your learning and give you last minute test prep before the exam A searchable glossary in PDF to give you instant access to the key terms you need to know for the exam Coverage of all of the exam topics in the book means you ll be ready for Security and Risk Management Asset Security Security Engineering Communication and Network Security Identity and Access Management Security Assessment and Testing Security Operations Software Development Security **Food-Energy-Water Systems: Achieving Climate Resilience and Sustainable Development in the 21st Century** Charles Vörösmarty, Richard Lawford, Pietro Elia Campana, Donald Wuebbles, Graham Jewitt, 2024-01-23 extreme weather will mean ongoing challenges to the capacity of these sectors to support human well being grow the economy and provide critical environmental services Society has yet to evaluate the resilience of FEWS to climate environmental and management stresses as it shapes strategies to support sustainable development over the next decades These issues constitute a quintessential interdisciplinary research challenge and require a well structured science agenda and supportive information services for implementing key findings that governments and stakeholders can adopt Integrated policy pathways require usable research findings applications models real time information systems and decision support systems In addition stakeholder engagement is essential to communicate the benefits and results of these approaches and to engage appropriate groups in their implementation **Huntsville, Chase**
