Ways Of Structure Building Oxford Studies In Theoretical Linguistics:

Ways of Structure Building Myriam Uribe-Etxebarria, Vidal Valmala, 2012-06 This volume addresses some of the most important approaches to the following key questions in contemporary generative syntactic theory What are the operations available for syntactic structure building in natural languages What are the triggers behind them and Which constraints are involved in the operations Internationally recognised scholars and young researchers propose new answers on the basis of detailed discussions of a wide range of phenomena Gapping Right Node Raising Comparative Deletion Across The Board movement Tough constructions Nominalizations Scope interactions Wh movement A movement Case and Agreement relations among others Their discussions draw on evidence from a rich variety of languages including Brazilian Portuguese Bulgarian Croatian English German Icelandic Japanese Spanish Vata and Vietnamese The proposals presented illustrate the shift in the locus of the explanation of linguistic phenomena that characterizes contemporary linguistic theory a shift in many cases from a model which relies on properties of systems external to narrow syntax such as the Lexicon or the Phonetic Form component to one which relies on properties of the structure building mechanisms themselves The volume will interest researchers and students of theoretical linguistics from advanced undergraduate and above *Ways of Structure Building*, 2012 This volume addresses some of the most important approaches to the following key questions in contemporary generative syntactic theory What are the operations available for syntactic structure building in natural languages What are the triggers behind them and Which constraints are involved in the operations *A Phi-Syntax for Nominal Concord* Marco Benincasa, 2018-03-26 The book focusses on the grammatical feature definiteness in German visible in the inflection of adjectives ein sch n es Kind vs das sch n e Kind It argues for an analysis of this effect that draws a connection to the visible categories of number and gender on nouns and related words rather than an abstract property This conclusion rests on the conflation of the established grammatical categories into a single one number gender which explains a vast body of grammatical phenomena in German and principles of language in general Final Particles Sylvie Hancil, Alexander Haselow, Margje Post, 2015-04-24 This volume brings together sixteen in depth studies of final particles in various languages of the world offering a rich variety of approaches to this still relatively underresearched class of elements The volume is of interest to typologists to experts in syntax and the analysis of spoken language and to linguists studying the form and function of final particles in single languages Final particles offers an overview of the different types of final particles found in typologically distinct languages different methodological approaches to the study of final particles and of typical grammaticalization pathways that these elements have taken in different languages **The Semantics of Evaluativity** Jessica Rett, 2015 This book focuses on the semantic phenomenon of evaluativity and its consequences across constructions Evaluativity has traditionally been associated exclusively with the positive construction a term for sentences with a gradable adjective but with no overt degree morphology John is tall is evaluative because it entails that John is tall relative to a

contextually valued standard John is taller than Sue and John is as tall as Sue are not evaluative because both could be used even if John and Sue were short Previous accounts of evaluativity have assumed that it is not part of the inherent meaning of adjectives but is contributed by a null morpheme Jessica Rett argues against this analysis proposing that no null morpheme is required Instead evaluativity is explained on the basis of assumptions that speakers and hearers make about the relationship between the simplicity of a situation and the simplicity of the language used to describe that situation the analysis is couched in recent approaches to Gricean conversational implicature

Control and Restructuring Thomas Grano, 2015-03-26 This book investigates the phenomenon of control structures configurations in which the subject of the embedded clause is missing and is construed as coreferential with the subject of the embedding clause e g John wanted to leave It draws on data from English Mandarin Chinese and Modern Greek to investigate the relationship that control bears both to restructuring the phenomenon whereby some apparently biclausal structures behave as though they constitute just one clause and to the meanings of the embedding predicates that participate in these structures Thomas Grano argues that restructuring is cross linguistically pervasive and that by virtue of its co occurrence with some control predicates but not others it serves as evidence for a basic division within the class of complement control structures This division is connected to how the semantics of the control predicate interacts with general principles of clausal architecture and of the syntax semantics interface His findings have general implications both for clausal structure and for the relationship between form and meaning in natural language

Continuations and Natural Language Chris Barker, Chung-Chieh Shan, 2014 The continuation of an expression is a portion of its surrounding context This book proposes and defends the continuation hypothesis that the meaning of a natural language expression can depend on its own continuation it can denote a function on its surrounding context

The Morphology and Phonology of Exponence Jochen Trommer, 2012-09-27 Exponence refers to the mapping of morphosyntactic structure to phonological representations a research area which is not only highly controversial but also approached in fundamentally different ways in theoretical morphology and phonology This volume brings together leading specialists from morphosyntax and morphophonology The authors address common problems questions and solutions in both areas and formulate a coherent research program for exponence which integrates the central insights of the last decades and provides important new challenges for the future The book is aimed at phonologists morphologists and syntacticians of all theoretical persuasions at graduate level and above

The Grammar of Expressivity Daniel Gutzmann, 2019-01-10 This volume provides a detailed account of the syntax of expressive language that is utterances that express rather than describe the emotions and attitudes of the speaker While the expressive function of natural language has been widely studied in recent years the role that grammar plays in the interpretation of expressive items has been largely neglected in the semantic and pragmatic literature Daniel Gutzmann demonstrates that expressivity has strong syntactic reflexes that interact with the semantic and pragmatic interpretation of these utterances and argues

that expressivity is in fact a syntactic feature on a par with other established features such as tense and gender. Evidence for this claim is drawn from three detailed case studies of expressive adjectives, intensifiers and vocatives; their puzzling properties are accounted for through a minimalist approach to syntactic features and agreement which shows that expressivity can partake in agreement operations, trigger movement and be selected for syntactically. The analysis not only supports the hypothesis of expressive syntax but also highlights the hidden role that grammar may play in phenomena that are traditionally considered to be solely semantic in nature.

The Grammar of Copulas Across Languages María J. Arche, Antonio Fábregas, Rafael Marín, 2019-01-03. This volume presents a crosslinguistic survey of the current theoretical debates around copular constructions from a generative perspective. Following an introduction to the main questions surrounding the analysis and categorization of copulas, the chapters address a range of key topics including the existence of more than one copular form in certain languages, the factors determining the presence or absence of a copula and the morphology of copular forms. The team of expert contributors present new theoretical proposals regarding the formal mechanisms behind the behaviour and patterns observed in copulas in a wide range of typologically diverse languages including Czech, French, Korean and languages from the Dene and Bantu families. Their findings have implications beyond the study of copulas and shed more light on issues such as agreement relations, the nature of grammatical categories and nominal predicates in syntax and semantics.

The Morphosyntax of Transitions Víctor Acedo-Matellán, 2016-02-18. This book examines the cross linguistic expression of changes of location or state, taking as a starting point Talmy's typological generalization that classifies languages as either satellite framed or verb framed. In verb framed languages such as those of the Romance family, the result state or location is encoded in the verb. In satellite framed languages such as English or Latin, the result state or location is encoded in a non verbal element. These languages can be further subdivided into weak satellite framed languages in which the element expressing result must form a word with the verb, and strong satellite framed languages in which it is expressed by an independent element, an adjective, a prepositional phrase or a particle. In this volume, Víctor Acedo Matellán explores the similarities between Latin and Slavic in their expression of events of transition; neither allows the expression of complex adjectival resultative constructions and both express the result state or location of a complex transition through prefixes. They are therefore analysed as weak satellite framed languages along with Ancient Greek and some varieties of Mandarin Chinese, and stand in contrast to strong satellite framed languages such as English, the Germanic languages in general and Finno Ugric. This variation is expressed in terms of the morphological properties of the head that expresses transition, which is argued to be affixal in weak but not in strong satellite framed languages. The author takes a neo constructionist approach to argument structure which accounts for the verbal elasticity shown by Latin and a Distributed Morphology approach to the syntax morphology interface.

Syntax and Its Limits Raffaella Folli, Christina Sevdali, Robert Truswell, 2013-12. In this book leading linguists explore the empirical scope of syntactic theory by

concentrating on a set of phenomena for which both syntactic and nonsyntactic analyses appear plausible The volume is organized into four thematic sections architectures syntax and information structure syntax and the lexicon and lexical items at the interfaces

Sluicing: Cross-Linguistic Perspectives Jason Merchant, Andrew Simpson, 2012-05-03 This book of new research by leading experts expands our current understanding of the ways in which languages allow for ellipsis of the sluicing type to occur and shows how sluicing constructions reveal important information about the general architecture of grammar

Encoding Events Xuhui Hu, 2018-09-04 This volume presents theoretical and empirical research on the syntax of events within the broader framework of generative grammar focusing on the central question of how conceptual meaning interacts with narrow syntactic computation Xuhui Hu proposes a set of integration conditions that require the content of the predicate to be licensed by theta role information generated by narrow syntax The other principal theoretical component of the book concerns the functional structure of events which is related to issues such as the parallel between the event and nominal domains the mapping of a predicate onto an entity and the grammatical foundation of verb classification The framework is applied to three areas the syntax of resultatives in English and Chinese cross linguistic and diachronic variation in resultatives and applicative constructions The findings shed light on the thematic relationship between core arguments and predicates and on the syntax of non core arguments contribute to the theory of parametric variation in the generative tradition and provide insights into the verb framed vs satellite framed typology

A Minimalist Theory of Simplest Merge Samuel D. Epstein, Hisatsugu Kitahara, T. Daniel Seely, 2021-09-28 This collection explicates one of the core ideas underpinning Minimalist theory explanation via simplification and its role in shaping some of the latest developments within this framework specifically the simplest Merge hypothesis and the reduction of syntactic phenomena to third factor considerations Bringing together recent papers on the topic by Epstein Kitahara and Seely with one by Epstein Seely and Obata and one by Kitahara the book begins with an introduction which situates the papers in a cohesive overview of some of the latest research on Minimalism as facilitated by current theoretical developments The volume integrates a historical overview of evolutions in Merge starting with Chomsky's pre Merge Aspects model up to current theoretical models including a primer of Chomsky's most recent theory of Merge based on the concept of Workspace The Minimalist notions of perfection and simplification are also outlined providing clearly explicated coverage of key technical concepts within the framework as applied to grammatical phenomena Taken as a whole the collection both introduces and advances Minimalist theory for students and scholars in linguistics and related sub disciplines of psychology philosophy and cognitive science as well as offering new directions for future research for researchers in these fields

Genericity Alda Mari, Claire Beyssade, Fabio Del Prete, 2013 This book provides an up to date introduction to the study of generics It gathers new work from senior and young researchers and is organized along three main areas of study the generic and individuals genericity and time and the sources of genericity and types of judgment

The Interaction of Focus, Givenness, and Prosody Vieri Samek-Lodovici, 2015 This is

an open access title available under a CC BY NC ND 4 0 licence This book examines some of the main factors determining the word order of Italian sentences One such factor contrastive focus concerns the final position of phrases that are emphatically contrasted relative to other similar phrases e g JOHN called not Bill The study of Italian has been particularly relevant to claims that these phrases must always be placed in specific positionstoward the front of a sentence This book examines the conflicting conditions affecting sentences containing both focused and unfocused phrases showing that when these conditions and their effects areidentified the position of contrastively focused phrases is radically different from what was previously thought The book also investigates why this would be the case concluding that prosodic conditions concerning the placement of intonational stress are ultimately responsible for key aspects of the word order of Italian sentences an unexpected result showing that intonation can affect how words are combined together

Gender and Noun

Classification Eric Mathieu, Myriam Dali, Gita Zareikar, 2019 This volume explores the many ways by which natural languages categorize nouns into genders or classes The findings in the volume have significant implications for syntactic theory and theories of interpretation and contribute to a greater understanding of the interplay between inflection and derivation

Semantics and Morphosyntactic Variation Itamar Francez, Andrew Koontz-Garboden, 2017 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations This book explores a key issue in linguistic theory the systematic variation in form between semantic equivalents across languages Two contrasting views of the role of lexical meaning in the analysis of such variation can be found in the literature i uniformity whereby lexical meaning is universal and variation arises from idiosyncratic differences in the inventory and phonological shape of language particular functional material and ii transparency whereby systematic variation in form arises from systematic variation in the meaning of basic lexical items In this volume Itamar Francez and Andrew Koontz Garboden contrast these views as applied to the empirical domain of property concept sentences sentences expressing adjectival predication and their translational equivalents across languages They demonstrate that property concept sentences vary systematically between possessive and predicative form and propose a transparentist analysis of this variation that links it to the lexical denotations of basic property concept lexemes At the heart of the analysis are qualities mass like model theoretic objects that closely resemble scales The authors contrast their transparentist analysis with uniformitarian alternatives demonstrating its theoretical and empirical advantages They then show that the proposed theory of qualities can account for interesting and novel observations in two central domains of grammatical theory the theory of syntactic categories and the theory of mass nouns The overall results highlight the importance of the lexicon as a locus of generalizations about the limits of crosslinguistic variation
