McKenzie, D. Eric Hyatt, V. Janet McDonald, 2012-12-06 Today environmental problems of unprecedented magnitude confront planet earth The sobering fact is that a whole range of human activities is affecting our global environment as profoundly as the billions of years of evolution that preceded our tenure on Earth The pressure on vital natural resources in the developing world and elsewhere is intense and the destruction of tropical forests wildlife habitat and other irreplaceable resources is alarming Climate change ozone depletion loss of genetic diversity and marine pollution are critical global environmental concerns Their cumulative

impact threatens to destroy the planet's natural resources. The need to address this situation is urgent. More than at any previous moment in history, nature and ecological systems are in human hands, dependent on human efforts. The earth is an interconnected and interdependent global ecosystem, and change in one part of the system often causes unexpected change in other parts. Atmospheric, oceanic, wetland, terrestrial, and other ecological systems have a finite capacity to absorb the environmental degradation caused by human behavior. The need for an environmentally sound, sustainable economy to ease this degradation is evident and urgent. Policies designed to stimulate economic development by foregoing pollution controls both destroy the long-term economy and ravage the environment. Over the years, we have sometimes drawn artificial distinctions between the health of individuals and the health of ecosystems. But in the real world, those distinctions do not exist.

Handbook of Research on Global Corporate Citizenship Andreas Georg Scherer, Guido Palazzo, 2008

Want to know what's buzzing with corporate citizenship? Look no further. This book shows why global corporate citizenship has been called the topic of the decade and why it matters to each of us, no matter where we live. It explains in plain English the major issues and ideas percolating in current research on the topic. Trust what you discover in the book. The list of contributors to Handbook of Research on Global Corporate Citizenship reads like a Who's Who of corporate citizenship research. Thomas Donaldson, University of Pennsylvania, US. This is a unique and eclectic set of essays on a vitally important but often neglected topic. The editors are to be congratulated in assembling a distinguished group of scholars who carefully and expertly guide the reader through the various facets of global corporate citizenship. This is a must-read for anyone interested in the social ramifications of the globalization of business activity. John H. Dunning, OBE, University of Reading, UK, and Rutgers University, US. Start with a fact: large corporations wield enormous power in the contemporary globalized economy. Then note the hopes and fears that this fact inspired: the potential to harness the profit motive to social needs, but the fear that the profit motive can just as easily wreak havoc. And finally, bring together some leading scholars from around the world to discuss the matter, and the result is a hugely impressive collection of essays on one of the burning issues of our time. This volume is definitive, the necessary starting point for future debate. Paul S. Adler, University of Southern California, US. This volume provides an extensive and comprehensive overview of current research and theory about why and how corporations should play a more active role in fulfilling their global citizenship obligations and responsibilities. Its contributors include many of the most important and influential scholars in the field of corporate social responsibility from both Europe and the US. An important strength of this volume is the diversity and breadth of the dimensions of corporate citizenship that it explores in depth. This volume provides an important resource to scholars, managers, and activists interested in promoting corporate citizenship. David Vogel, University of California, Berkeley, US. The Handbook of Research on Global Corporate Citizenship identifies and fosters key interdisciplinary research on corporate citizenship and provides a framework for further academic debate on corporate responsibility in a global society. This exciting and important Handbook provides a unique forum to discuss the

consequences of the social and political mandate of business firms and examines the implications of these consequences for the theory of the firm. Leading academics have been invited from various disciplines such as management studies, economics, sociology, legal studies and political science to evaluate the concept of corporate citizenship and to analyze the role of private business in global governance and the production of global public goods. The Handbook is structured in seven sections: theoretical perspectives on corporate citizenship; contemporary issues and challenges of global business regulation; actors and institutions of global business regulation; disciplinary perspectives on corporate citizenship; implications for management theory building; critical perspectives on corporate citizenship; conclusions. This Handbook will be a significant read for academics, postgraduate students and managers interested in the field of corporate citizenship, regulation and corporate responsibility across the social sciences.

Green and Lean Management Carolina Machado, J. Paulo Davim, 2016-10-12. This book focusses on the challenges and changes organizational management faces in an era when the need to develop environmentally aware processes meets high levels of competition. It covers the synergetic effects how re-use, recycling, waste reduction and other sustainable production strategies can add value, low costs and time of production. Sustainable business behavior is not only an environmental perspective on management but more and more contains an organizational perspective. Taking into account these issues, green and lean management appears as the way managers can drive their employees to continuously improve the management processes that add value to the organization and customers. This book provides information on principles, strategies, models and applications of green and lean management and at the same time communicates the latest research activity relating to this scientific field world wide.

Reputation Risk and Globalisation Terry O'Callaghan, 2016-10-28. Recently multinational corporations have begun to reinvent themselves as socially responsible actors largely in response to anti corporate activist pressure. The author argues that a concern with corporate reputation is leading to an ideational shift in corporate behaviour in essence it is disciplining their behaviour. This innovative exploration of the idea of a self regulating corporation in an era of globalisation first examines the link between corporate reputation, corporate behaviour and self regulation and then goes on to compare and contrast various studies of multinational corporations that have sought to self regulate. Terry O'Callaghan includes a multifaceted critique of anti corporate activists. This acknowledges both the dangers that multinational corporations pose to communities and that anti corporate activists are the first group to understand the potential risk of targeted campaigns to corporate reputations. He also illustrates his points using three case studies of companies that have attempted to self regulate: Royal Dutch Shell, the Toyota Motor Corporation and Interface Inc. Undergraduate and postgraduate students of international business management and business ethics will be interested in the essential topics covered in this book. Academics and practitioners alike will appreciate its accessible lessons about reputational capital and holding multinational corporations accountable.

Transformational Growth and the Business Cycle Edward Nell, 2005-09-27. This book examines the concept of Transformational Growth from a

number of different historical and geographical perspectives Transformational Growth sees the economy as an evolving system in which the market selects and finances innovations changing the character of costs and affecting the pattern of market adjustment This creates the possibility that markets will work differently in particular historical periods This book explores market adjustments in two distinct historical periods 1870 1914 and 1945 the present The book focuses on six countries USA United Kingdom Canada Germany Japan and Argentina In all cases the earlier period dominated by craft based technologies proves to be the one in which markets adjust through a weakly stabilising price mechanism By contrast in the later period in all cases with the exception of Argentina there is no evidence of such a price mechanism but in its place can be seen a multiplier accelerator process which arguably reflects a change of technology to mass production
