The Psychology of Property Law Stephanie M. Stern,Daphna Lewinsohn-Zamir,2020-02-25 Considers how research in psychology offers new perspectives on property law and suggests avenues of reform Property law governs the acquisition use and transfer of resources It resolves competing claims to property provides legal rules for transactions affords protection to property from interference by the state and determines remedies for injury to property rights In seeking to accomplish these goals the law of property is concerned with human cognition and behavior How do we allocate property both initially and over time and what factors determine the perceived

fairness of those distributions What social and psychological forces underlie determinations that certain uses of property are reasonable What remedies do property owners prefer The Psychology of Property Law explains how assumptions about human judgement decision making and behavior have shaped different property rules and examines to what extent these assumptions are supported by the research Employing key findings from psychology the book considers whether property law's goals could be achieved more successfully with different rules In addition the book highlights property laws and conflicts that offer productive areas for further behaviorally informed research The book critically addresses several topics from property law for which psychology has a great deal to contribute These include ownership and possession legal protections for residential and personal property takings of property by the state redistribution through property law real estate transactions discrimination in housing and land use and remedies for injury to property

Cases, Materials and Text on Property Law Sjef van Erp, Bram Akkermans, 2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe's major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the Ius Commune Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe
