*From GIVING to IMPACT: Venture Philanthropy.* James A. Levine, 2025-09-23 Venture philanthropy is giving that works It is bold structured and built to solve real problems not just fund them Venture philanthropy VP offers a different path It combines the heart of philanthropy with the tools of business It is not about making money but it is about making change Whether you are a foundation leader a donor a social entrepreneur or someone who just wants to do good differently this guide is for you In traditional philanthropy you give a grant The money is usually unrestricted The organization thanks you runs its program and maybe sends you an annual report It is well intentioned but sometimes it is hard to know if your donation really made a difference In venture capital you invest in a startup You check their business plan negotiate terms expect results and if things go well you get a return The process is rigorous data driven and aimed at success Venture philanthropy takes the best of both You fund organizations or projects that are tackling big social problems but instead of walking away you stay engaged You measure progress You fund in stages You offer advice tools and support And if there is a financial return like a loan repaid or an equity stake you reinvest it in your next impact project ABOUT THE AUTHOR Professor James A LEVINE MD PhD Dr Levine President Fondation Ipsen has three decades of experience in the healthcare sector principally at Mayo Clinic For the last 6 years he has been President of Fondation Ipsen an international science foundation focused on biotech innovation in Rare Diseases A physician and scientist James has published more than 200 articles six papers in Science and Nature plus articles in journals such as the New England Journal of Medicine Lancet and JAMA He has written

NEUROTHERAPEUTICS IN THE ERA OF TRANSLATIONAL MEDICINE. RICHARD A. SMITH,2021 Handbook of Generalized Pairwise Comparisons Marc Buyse,Johan Verbeeck,Everardo D. Saad,Mickaël De Backer,Vaiva Deltuvaite-Thomas,Geert Molenberghs,2025-03-31 In today s healthcare landscape there is a pressing need for quantitative methodologies that include the patients perspective in any treatment decision Handbook of Generalized Pairwise Comparisons Methods for Patient Centric Analysis provides a comprehensive overview of an innovative and powerful statistical methodology that generalizes the traditional Wilcoxon Mann Whitney test by extending it to any number of outcomes of any type and including thresholds of clinical relevance into a single multidimensional evaluation The book covers the statistical foundations of generalized pairwise comparisons GPC applications in various disease areas implications for regulatory approvals and benefit risk analyses and considerations for patient centricity in clinical research With contributions from leading experts in the field this book stands as an essential resource for a more holistic and patient centric assessment of treatment effects

**Informing the Future** Institute of Medicine,2010-03-19 Today perhaps more than ever health care

is a key item on the nation's agenda. Government policy makers, health professionals, scientists, industrial and civic leaders, patient advocates and private citizens across the social spectrum are focusing on how best to obtain a high quality health system that is efficient and affordable in its operation and that functions well for everyone. The Institute of Medicine (IOM) regularly considers this challenge from a variety of perspectives. Recent efforts have focused on improving the organization and operation of the nation's largest health agency, working to assess what diagnostic, therapeutic and preventive services work best, gauging the overall health of the nation's population and identifying ways to build an even stronger foundation of evidence-based medicine that effectively captures the promise of scientific discovery and technological innovation and enables doctors, nurses and other health professionals to provide the right care for the right patient at the right time. The body of this book illustrates the work of IOM committees in selected major areas in recent years, followed by a description of IOM's convening and collaborative activities and fellowship programs. The last section provides a comprehensive bibliography of IOM reports published since 2007.

**Preserving the Promise** Scott Dessain, Scott E. Fishman, 2016-10-05. Preserving the Promise: Improving the Culture of Biotech Investment critically examines why most biotech startups fail as they emerge from universities into an ecosystem that inhibits rather than encourages innovation. This Valley of Death squanders our public investments in medical research and with them the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In Preserving the Promise, Dessain and Fishman build on their collective experience as company founders, healthcare investor, Fishman and physician scientist, Dessain. The book offers a forward-looking critical analysis of conventional wisdom that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death that waste money and extinguish innovative technologies through distorted financial incentives. Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death. Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor, entrepreneurs and patients. Examines the critical early stages of commercialization where technology transfer offices and Angels act as gatekeepers to development and where tension between short-term financial and long-term clinical aspirations sinks important technologies. Deconstructs the forces driving biotech, recasts them in a proven conceptual framework and offers practical guidance for making the system better.

**Rare Diseases and Orphan Products** Institute of Medicine, Board on Health Sciences Policy, Committee on Accelerating Rare Diseases Research and Orphan Product Development, 2011-04-03. Rare diseases collectively affect millions of Americans of all ages, but developing drugs and medical devices to prevent, diagnose and treat these conditions is challenging. The Institute of Medicine (IOM) recommends implementing an integrated national strategy to promote rare diseases research and product development.

**Breakthrough Business Models** Institute of Medicine, Board on Health Sciences Policy, Forum on Drug Discovery, Development, and Translation, Robert Giffin, Sally Robinson, Theresa Wizemann, 2009-03-17 The process for developing new drug and biologic products is extraordinarily expensive and time consuming Although large pharmaceutical companies may be able to afford the cost of development because they can expect a large return on investment organizations developing drugs to treat rare and neglected diseases are unable to rely on such returns On June 23 2008 the Institute of Medicine's Forum on Drug Discovery Development and Translation held a public workshop Breakthrough Business Models Drug Development for Rare and Neglected Diseases and Individualized Therapies which sought to explore new and innovative

strategies for developing drugs for rare and neglected diseases      **From Altruism to Investment** Joshua D. Merchant, 2014

Competition for philanthropic dollars has escalated in recent years particularly in higher education A new type of charitable giving venture philanthropy has emerged and is impacting both educational policy and practice Venture philanthropy involves donors using business models championed practices of venture capitalists and decision making procedures to drive their philanthropy and ongoing engagement with organizations they support Venture philanthropy has the potential to improve the financial vitality of colleges and universities However it also poses significant questions to the academy as more colleges and universities engage with donors who embrace its tenets The primary research question seeks to understand in what ways venture philanthropy has impacted shared governance of private liberal arts colleges Secondary research questions explore who the decision makers involved in the cultivation solicitation acceptance and implementation of the gift were the benchmarks goals and results that were agreed to before the gift was received the motivation and process of accepting the gift and the lessons learned Administrators and faculty leaders at two liberal arts colleges were interviewed to determine how such gifts functioned within a collegial shared governance model The study indicated that the collegial model of shared governance needs to evolve to reflect the changes of philanthropy in higher education Faculty members want to be more engaged both in setting priorities and in the fundraising process Administrators need to promote increased transparency trust and engagement with faculty in the philanthropic process A new gift process needs to be formalized to manage venture philanthropy gifts Finally the collegial model in practice does not match theory Venture philanthropy donors have an incredible opportunity to financially impact colleges and universities nationwide but traditional theories of shared governance have not kept pace with the changes of external influence on higher education Recommendations for practices include promoting a shared vision more widely increasing transparency and consensus building improving faculty engagement in philanthropy strengthening leadership in negotiating gifts creating strategies for embracing venture philanthropy and improving the process of venture philanthropy gift acceptance      **Strategies for Foundations** Ashley Metz Cummings, Lisa Hehenberger, 2010-01-01
