War Is Not Inevitable On The Psychology Of War And Aggression:

War Is Not Inevitable Henri Parens, 2014-07-22 In 1932 Einstein asked Freud Is there any way of delivering mankind from the menace of war Freud answered that war is inevitable because humans have an instinct to self destroy a death instinct which we must externalize to survive But nearly four decades of study of aggression reveal that rather than being an inborn drive destructiveness is generated in us by experiences of excessive psychic pain In War Is Not Inevitable On the Psychology of War and Aggression Henri Parens argues that the death instinct based model of aggression can neither be proved nor disproved as Freud s answer is untestable By contrast the multi trends theory of aggression is provable and has greater heuristic value than does a death instinct based model of aggression When we look for causes for war we turn to history as well as national ethnic territorial and or political issues among many others but we also tend to ignore the psychological factors that play a large role Parens discusses such psychological factors that seem to lead large groups into conflict Central among these are the psychodynamics of large group narcissism Interactional conditions stand out hyper narcissistic large groups have in history caused much narcissistic injury to those they believe they are superior to But this is commonly followed by the narcissistically injured group s experiencing high level hostile destructiveness toward their injury perpetrator which in time will compel them to revenge Among groups that have been engaged in serial conflicts wars have followed from this psychodynamic narcissism based cyclicity Parens details some of the psychodynamics that led from World War I to World War II and their respective aftermath and he addresses how major factors that gave rise to these wars must can and have been counteracted In doing so Parens considers strategies by which civilization has and is constructively preventing wars as well as the need for further innovative efforts to achieve that end **Signs, Intentionality, and**

Book jacket Who Benefits from Global Violence and War Marc Pilisuk, 2007-12-30 Military, economic and environmental violence in the era of globalization cause immense suffering and may ultimately threaten the existence of life as we know it, but author Pilisuk explains that the future can change if we understand and act upon the roots of violence. A professor emeritus of psychology and human and community development, Pilisuk explains how most violence is the product of a human built social order in which some people and institutions control most of the resources, make the decisions that necessitate violence and operate with minimal accountability. The common root of war, poverty, environmental destruction and other forms of violence is spotlighted. Such violence, says Pilisuk, is a natural consequence of a system inordinately influenced by a relatively small interconnected group of corporate, military and government leaders with the power to instill fear to increase their excessive fortunes and to restrict information particularly about their own clandestine dealings. This text includes scholarship hailing from across disciplines combined with information from investigative journalism and insights from nonprofit watchdog groups, all shedding light on centralized power and its effects. Pilisuk presents material including the range of tactics used to manipulate and destroy

adversaries the human capacity to kill as a challenge and how media is used by powerful groups to manipulate fear and maintain their power Here readers find solid social science to support what whistleblowers and social critics are observing about a system that needs change

Why War? Richard Overy, 2024-06-04 An Economist Best Book of the Year Richard Overy is one of the world's finest military historians His book is timely for those interested in preventing war Gen Mark Milley U S Army retired 20th Chairman of the Joint Chiefs of Staff Army magazine Why has war been such a consistent presence throughout the human past A leading historian explains drawing on rich examples and keen insight Richard Overy is not the first scholar to take up the title question In 1931 at the request of the League of Nations Albert Einstein asked Sigmund Freud to collaborate on a short work examining whether there was a way of delivering mankind from the menace of war Published the next year as a pamphlet entitled Why War it conveyed Freud's conclusion that the death drive made any deliverance impossible the psychological impulse to destruction was universal in the animal kingdom The global wars of the later 1930s and 1940s seemed ample evidence of the dismal conclusion A preeminent historian of those wars Overy brings vast knowledge to the title question and years of experience unraveling the knotted motivations of war His approach is to separate the major drivers and motivations and consider the ways each has contributed to organized conflict They range from the impulses embedded in human biology and psychology to the incentives to conflict developed through cultural evolution to competition for resources conflicts stirred by the passions of belief the effects of ecological stresses the drive for power in leaders and nations and the search for security The discussions show remarkable range delving deep into the Neolithic past through the twentieth century world wars and up to the current conflict in Ukraine The examples are absorbing from the Roman Empire's voracious appetite for resources to the impulse to power evident in Alexander the Great Napoleon and Hitler The conclusion is not hopeful but Overy's book is a gift to readers a compact judicious engrossing examination of a fundamental question

The Hidden Structure of Violence Marc Pilisuk, Jennifer Achord Rountree, 2015-07-17 Acts of violence assume many forms they may travel by the arc of a guided missile or in the language of an economic policy and they may leave behind a smoldering village or a starved child The all pervasiveness of violence makes it seem like an unavoidable and ultimately incomprehensible aspect of the modern world But in this detailed and expansive book Marc Pilisuk and Jen Rountree demonstrate otherwise Widespread violence they argue is in fact an expression of the underlying social order and whether it is carried out by military forces or by patterns of investment the aim is to strengthen that order for the benefit of the powerful The Hidden Structure of Violence marshals vast amounts of evidence to examine the costs of direct violence including military preparedness and the social reverberations of war alongside the costs of structural violence expressed as poverty and chronic illness It also documents the relatively small number of people and corporations responsible for facilitating the violent status quo whether by setting the range of permissible discussion or benefiting directly as financiers and manufacturers The result is a stunning indictment of our violent world and a powerful

critique of the ways through which violence is reproduced on a daily basis whether at the highest levels of the state or in the deepest recesses of the mind *Proceedings of the XXIV International Congress of Psychology of the International Union of Psychological Science (I.U. Psy. S.), Sydney, Australia, August 28-September 2, 1988* Douglas Vickers, Joseph P Forgas, J. Michael Innes, Ronald C King, Philip L Smith, Ronald C. King, John K. Chimpanzees, War, and History R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill

Communication and Culture in War and Peace Colleen Roach, 1993-02-01 Roach provides an excellent account of the contributions of feminist peace researchers to the analysis of cultural militarism and its twin cultural violence against women Altogether this book is a worthy enterprise that will help both activists and scholars gain a more in depth understanding of the barriers to change erected by the media s use of information technology and will be useful in developing scenarios and strategies for the creative use of that technology for peaceful social transformation Elise Boulding in *Media Development* Does the media have a perverse fascination with war and violence Do television newspapers and magazines neglect the forces of peace in favor of the more dramatic war machines thereby amplifying the guns rather than muting them If so how does media coverage reflect the culture for which it works By exploring the role of both culture and mass media this volume fills a crucial void in the study of war and peace Outstanding scholars provide a history and overview of critical mass media research and investigate emerging issues dealing with the ongoing debate over communication in war and peace Several chapters deal specifically with the role of communication culture in the Gulf War while others discuss more general themes including the military industrial communication complex cultural imperialism and transnational control of communication Many of the essays offer a uniquely feminist reading of war and peace a perspective typically unacknowledged in mainstream communication work This timely book also weaves peripheral concerns like multiculturalism international communication law women and peace and communication technology into the primary themes of media and war The research and practical information given here will be useful for courses in peace and conflict studies international mass communication and intercultural communication Professionals in international relations negotiations and the media will find this book to be both fascinating and illuminating Original research on the coverage of disarmament stories and peace issues in Canadian dailies and Vincent Mosco s excellent

blueprint for converting the military machine to a peace system give Roach's work practical and positive dimensions. Abstracts at the beginning of the chapters, full bibliographies, and a preface by the father of peace studies, Johan Galtung, add to the importance of this book. Recommended for anyone interested in the use of mass media to cover up, explain, promote governmental efforts to keep situations tense and warlike. *Choice*. Communication and Culture in War and Peace provides a strategic road map for scholarly and citizen action. This is tightly edited, passionately and convincingly argued, and a broadly conceived book. It fills a large gap and is likely to be a widely used seminal resource and text for some time to come. George Gerbner, Professor of Communication and Dean Emeritus, University of Pennsylvania.
