the Transformation of Global Capitalism Ho-fung Hung,2009-09-15 This volume explains China's economic rise and liberalization and assesses how this growth is reshaping the structure and dynamics of global capitalism in the twenty first century China has historically been the center of Asian trade economic and financial networks and its global influence continues to expand in the twenty first century In exploring the causes for and effects of China's re-surfing power this volume takes a broad long term view that reaches well beyond economics for answers Contributors explore the vast web of complex issues raised by China's ascendancy The first three chapters discuss the global and historical origins of China's shift

to a market economy and that transformation's impact on the international market system. Subsequent essays explore the ability of large Chinese manufacturers to counter the might of transnational retailers, the effect of China's rise on world income distribution and labor, and the consequences of a stronger China for its two most powerful neighbors, Russia and Japan. The concluding chapter questions whether China's growth is sustainable and if it will ultimately shift the center of global capitalism from the West to the East.

Business model innovation is the new strategic imperative for all leaders. Blockbuster's executives saw Netflix coming. Yet they stuck with their bricks and mortar business model, losing billions in shareholder value. They were netflixed. Business models don't last as long as they used to. Historically, CEO's have managed a single business model over their entire careers. Today all organizations must be capable of designing, prototyping, and experimenting with new business models. The Business Model Innovation Factory provides leaders with the survival skills to create a pipeline of new business models in the face of disruptive markets and competition. Avoid being netflixed. Your organization must be a business model innovator to stay competitive in today's turbulent world. Author Saul Kaplan is the founder and chief catalyst of the Business Innovation Factory (BIF), a real world laboratory for exploring and testing new business models and social systems. BIF has attracted a global community of over five thousand innovators and organizes the internationally renowned BIF Collaborative Innovation Summit.
