

WAR IN HEAVEN

THE ARMS RACE IN OUTER SPACE

War In Heaven The Arms Race In Outer Space

Douglas Brode, Leah Deyneka

War In Heaven The Arms Race In Outer Space:

War in Heaven Helen Caldicott, Craig R. Eisendrath, 2007 When most of us think about the potential of outer space for future generations we think of world communications satellite navigation and scientific exploration U S Space Command however thinks about weapons Believing that conflict in space and wars fought from space are inevitable the president has called on the agency to weaponize outer space and thus provoke an arms race that could cost the United States trillions of dollars and could lead to the demise of the human race In War in Heaven a Nobel Prize nominated peace activist and a former U S foreign service officer who helped write the Outer Space Treaty of 1967 look at the history of military uses of space and the current plans for militarizing the heavens including kinetic laser nuclear bombardment and anti satellite weapons Contrary to the claims of Secretary of Defense Donald Rumsfeld that the United States faces a space Pearl Harbor Caldicott and Eisendrath show that the United States itself is today the principal obstruction to passage of an international treaty banning weapons from outer space At a time when plans to build and deploy space weapons are on the administration s agenda but only just becoming known to the general public this book will help launch a national discussion of a critical issue

Capital and the Cosmos Peter Dickens, 2023-01-01 This book offers a new understanding of society s relations with the cosmos Entrepreneurs such as Jeff Bezos and Elon Musk receive a great deal of publicity but offer unlikely and implausible visions of space tourism for the general public Meanwhile asteroids are seen as rare materials which will be extracted and used to produce untold riches for earthbound citizens The reality is rather different First there is no evidence that owners of capital are attempting to extract rare materials in the cosmos The costs would be out of this world But capital not governments is determining how outer space should be used Capital s investments in aerospace companies are actively determining forms of military interventions and the equipment used And satellite television pumps out forms of culture aimed at a global audience But these are being ignored and subverted by for example indigenous peoples In short this book sets out a new understanding of our relations with the cosmos The forces of capital are certainly powerful but at the same time they are being challenged subverted and even overturned

Original Sin Bleddyn E. Bowen, 2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today s orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth s cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognize rather than

hide its original sin **Reconceptualising Arms Control** Neil Cooper, David Mutimer, 2014-01-02 The theory and practice of arms control seemed to have its heyday during the height of the Cold War with its focus on the East West conflict and nuclear arms In the past twenty years both arms technologies and various practices aimed at their control have continued to develop but scholarly thinking has not kept up This volume seeks to redress this scholarly neglect of the range of issues associated with the control of the means of violence by asking the question what does arms control mean in the 21st Century In asking this question the volume examines issues surrounding sovereignty geopolitics nuclear disarmament securitization of space technological developments human rights the clearance of landmines the regulation of small arms and the control of the black market for arms and nuclear secrets The book discusses terrorism with reference to the case of the suicide attacks in Beirut in 1983 and how the Obama administration is orientating its posture on nuclear arms This book was published as a special issue of Contemporary Security Policy **The Province of All Mankind** Stephen Bueno, 2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Bueno argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon *Yearbook on Space Policy 2006/2007* Kai-Uwe Schrogl, Charlotte Mathieu, Nicolas Peter, 2008-10-20 The Yearbook on Space Policy aims to be the reference publication analyzing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European *Winning Space* Brandon J. Weichert, 2020-09-15 When President Donald J Trump announced the creation of America s sixth branch of the military the United States Space Force many in Washington scoffed But U S rivals in China Russia Iran and North Korea took notice Since the end of the Cold War these American foes have chafed under the full spectrum dominance that the American superpower has enjoyed globally They have identified space as a key strategic domain where they can challenge and possibly defeat the United States military And depriving the U S military and or its economy of access to space during an international crisis could spell doom for the United States in other strategic domains land sea air and cyberspace After all space is critical for America s vaunted information dominance Satellites overhead are the backbone of America s global military Remove them from orbit and U S forces worldwide are rendered deaf dumb and blind What s more space is a more than 1 trillion economy just waiting to be developed Whichever country gets there first will have considerable economic and geopolitical

power on Earth Despite President Trump's creation of the Space Force Swamp Dwellers in Washington continue resisting his reforms to U.S. space and technology policy

Winning Space tracks the increasing competition the United States is facing in the technology sector and depicts how the United States has been engaged in a Second Space Race and how it has been losing Author Brandon Weichert warns how the United States is at risk for a Pearl Harbor type event in space Weichert advocates for the full embrace of Trump's reforms for America's flailing space policy while also calling for a minimum 1 trillion investment in advanced research and development here in the United States to stay ahead of America's advancing foes Contrary to what many Americans may think the United States has been declining in space and the high technology development sector Should it lose its dominance in these areas it will surely lose its superpower status The next decade presents U.S. policymakers one last chance to preserve the superpower status that America fought two world wars and the Cold War to build Time is not on our side We are on notice but we have not noticed

Death by Moderation David A. Koplow, 2010 This book addresses an important but little noticed phenomenon in the revolutionary world of military technology Across a wide range of otherwise unrelated weapons programs the Pentagon is now pursuing arms that are deliberately crafted to be less powerful less deadly and less destructive than the systems they are designed to supplement or replace This direction is historically anomalous military forces generally pursue ever bigger bangs but the modern conditions of counter insurgency warfare and military operations other than war such as peacekeeping and humanitarian assistance demand a military capable of modulated force By providing a capacity to intervene deftly yet effectively the new generations of useable weaponry should enable the U.S. military to accomplish its demanding missions in a manner consistent with legal obligations public relations realities and political constraints Five case studies are provided regarding precision guided smart bombs low yield nuclear weapons self neutralizing anti personnel land mines directed energy anti satellite weapons and non lethal weapons

Raising Cain Wayne Harvey, 2013 Old as the hills see eye to eye raising Cain this collection of insights and anecdotes about how ancient scripture still shapes the things we say today is a great conversation piece and a fun testament to the Bible's lasting influence

Sex, Politics, and Religion in Star Wars Douglas Brode, Leah Deyneka, 2012-07-02 In 1977 Star Wars blazed across the screen to become one of the highest grossing and most beloved movies of all time spawning an unprecedented merchandising phenomenon It was followed by two sequels and three prequels all of which became blockbusters Comic books novels graphic novels and magazines devoted to the films added to the mythology of George Lucas's creation Despite the impact of the franchise on popular culture however discussion of the films from a scholarly perspective has not kept pace with the films In *Sex Politics and Religion in Star Wars* An Anthology Douglas Brode and Leah Deyneka have assembled a provocative collection of essays exploring some of the more intriguing aspects of the Star Wars phenomenon Contributors to the volume tackle such hot topics as race and racism in the Star Wars galaxy Judeo Christian and Eastern religious themes homosexual romance and philosophical and political implications both earthbound

and otherworldly These essays interpret the Star Wars universe from a variety of perspectives including feminist and Freudian offering insights from writers who bring a new passion to the subject A companion volume to Myth Media and Culture in Star Wars Sex Politics and Religion in Star Wars is an authoritative anthology incorporating scholarly analysis with engaging insights It will engross readers both fans and scholars alike
