Wheeler, 2018-06-19 *Birds of Prey of the West* and its companion volume *Birds of Prey of the East* are the most comprehensive and authoritative field guides to North American birds of prey ever published Written and lavishly illustrated with stunning lifelike paintings by leading field guide illustrator photographer and author Brian Wheeler the guides depict an enormous range of variations of age sex color and plumage and feature a significant amount of plumage data that has never been published before The painted figures illustrate plumage and species comparisons in a classic field guide layout Each species is shown in the same posture and from the same viewpoint which further assists comparisons Facing page text includes quick reference identification points and brief natural history accounts that incorporate the latest information The range maps are exceptionally accurate and much larger than those in other guides They plot the most up to date distribution information for each species and include the location of cities for more accurate reference Finally the guides feature color habitat photographs next to the maps The result sets a new standard for guides to North America s birds of prey Lavishly illustrated with stunning lifelike paintings Written and illustrated by a leading authority on North American birds of prey Depicts more plumages than any other guide Concise facing page text includes quick reference identification points Classic field guide layout makes comparing species easy Large accurate range maps include up to date distribution information Unique color habitat photographs next to the maps

Birds of the Central Platte River Valley and Adjacent Counties Paul A. Johnsgard, Mary Bomberger Brown, 2013-03-01 The central Platte River Valley region of Nebraska is described ecologically and defined as encompassing 11 counties and nearly 10 000 square miles and extending about 120 miles from the western edge of Lincoln County to the eastern edge of Merrick County At its center is the Platte River the historic spring staging area for Sandhill and Whooping cranes five species of geese and millions of waterfowl and water dependent birds in addition to providing the breeding habitats for more than 100 other bird species Collectively at least 373 bird species have been reported from the Central Platte Valley making it the most species rich bird location in Nebraska and of the most species diverse regions in the Great Plains The abundance distribution and habitats of these species are summarized with special consideration given to the Valley s three nationally threatened and endangered birds the Whooping Crane Interior Least Tern and Piping Plover and the now probably extinct Eskimo Curlew Also included

are a species checklist a list of 82 regional birding sites and a bibliography of 130 citations

The Avian Migrant John H. Rappole, 2013-06-11 The purpose of migration regardless of the distance involved is to exploit two or more environments suitable for survival or reproduction over time usually on a seasonal basis Yet individual organisms can practice the phenomenon differently and birds deploy unique patterns of movement over particular segments of time Incorporating the latest research on bird migration this concise critical assessment offers contemporary readers a firm grasp of what defines an avian migrant how the organism came to be what is known about its behavior and how we can resolve its enduring mysteries John H Rappole s sophisticated survey of field data clarifies key ecological biological physiological navigational and evolutionary concerns He begins with the very first migrants who traded a home environment of greater stability for one of greater seasonality and uses the structure of the annual cycle to examine the difference between migratory birds and their resident counterparts He ultimately connects these differences to evolutionary milestones that have shaped a migrant lifestyle through natural selection Rather than catalogue and describe various aspects of bird migration Rappole considers how the avian migrant fits within a larger ecological frame enabling a richer understanding of the phenomenon and its critical role in sustaining a hospitable and productive environment Rappole concludes with a focus on population biology and conservation across time periods considering the link between bird migration and the spread of disease among birds and humans and the effects of global warming on migrant breeding ranges reaction norms and macroecology
