Web Services, Service-Oriented Architectures, and Cloud Computing Douglas K. Barry,2003-05-28 Web services are leading to the use of more packaged software either as an internal service or an external service available over the Internet These services which will be connected together to create the information technology systems of the future will require less custom software in our organizations and more creativity in the connections between the services This book begins with a high level example of how an average person in an organization might interact with a service oriented architecture As the book progresses more technical detail is added in a peeling of the onion approach The leadership opportunities within these developing service oriented architectures are also explained At the end of the book there is a compendium or pocket library for software technology related to service oriented architectures Only web services book to cover both data management and software engineering perspectives excellent resource for ALL members of IT teams Jargon free highly illustrated with introduction that anyone can read that then leads into increasing technical detail Provides a set of leadership principles and suggested application for using this technology

Web Services Michael P. Papazoglou,2008 Web services represent the next generation of web based technology They allow new and improved ways for enterprise applications to communicate and integrate with each other and as such are having a profound effect on both the worlds of business and of software development

Web Services Anura Gurugé,2004-03-29 This reference guide on all aspects of Web services offers an executive brief for IT and senior management rather than a technical guide for portal implementers It focuses on business needs value propositions proven solutions and actual examples of contemporary implementations

Web Services Information Resources Management Association,2019 This book is an innovative reference source that examines relevant theoretical frameworks current practice guidelines industry standards and the latest empirical research findings in web services Highlighting a range of topics such as cloud computing quality of service and semantic web
