Description :

[A] witty and beguiling meditation on weeds and their wily ways. You will never look at a weed, or flourish a garden fork, in the same way again. Richard Holmes, author of *The Age of Wonder* In this fascinating, richly detailed book, Richard Mabey gives weeds their full due. Carl Zimmer, author of *Evolution* Richard Mabey, Great Britain's Britain's greatest living nature writer (London Times), has written a stirring and passionate defense of nature's most unloved plants. Weeds is a fascinating, eye-opening, and vastly entertaining appreciation of the natural world's unappreciated wildflowers that will appeal to fans of David Attenborough, Robert Sullivan's *Rats*, Amy Stewart's *Wicked Plants*, and to armchair gardeners, horticulturists, green-thumbs, all those who stop to smell the flowers.

With Descriptions of All the Most Pernicious and Troublesome Plants in the United States and Canada Their Habits of Growth
and Distribution With Methods of Control Nature is the great farmer Continually she sows and reaps making all the forces of
the universe her tools and helpers The sun s rays wind rain frost and snow insects and birds animals small and great even to
the humble burrowing worms of the earth all work mightily for her and a harvest of some kind is absolutely sure And to the
people who must wrest a living from the soil not only for themselves but for all mankind besides it must seem that Nature s
favorites are the hardy aggressive and often useless and harmful plants which they have named weeds Yet when man
interferes with the Great Mother s plans and insists that the crops shall be only such as may benefit and enrich himself she
seems to yield a willing obedience and under his guidance does immensely better work than when uncontrolled But Dame
Nature is an eye servant only by the sternest determination and the most unrelaxing vigilance can her fellow worker subdue
the earth to his will and fulfill the destiny foreshadowed in that primal blessing so sadly disguised and misnamed when the
first man was told Cursed is the ground for thy sake in sorrow shalt thou eat of it all the days of thy life thorns also and
thistles shall it bring forth to thee and thou shalt eat of the herb of the field A stern decree But the civilization of the peoples
of the earth is measured by the forward state of their agriculture and agriculture in its simplest terms is the compelling of
the soil to yield only such products as shall conduce to the welfare of the people who live upon it It resolves itself into a
contest with nature as to what plants shall be permitted to grow and the discovery of the easiest surest and most economical
