Topology Of Algebraic Curves Topology Of Algebraic Curves:

Topology of Algebraic Curves Alex Degtyarev, 2012-07-04 This monograph summarizes and extends a number of results on the topology of trigonal curves in geometrically ruled surfaces An emphasis is given to various applications of the theory to a few related areas most notably singular plane curves of small degree elliptic surfaces and Lefschetz fibrations both complex and real and Hurwitz equivalence of braid monodromy factorizations The approach relies on a close relation between trigonal curves elliptic surfaces a certain class of ribbon graphs and subgroups of the modular group which provides a combinatorial framework for the study of geometric objects A brief summary of the necessary auxiliary results and techniques used and a background of the principal problems dealt with are included in the text The book is intended to researchers and graduate students in the field of topology of complex and real algebraic varieties **Topology of real**

To sum up this book helps to learn algebraic geometry in a short time its concrete style is enjoyable for students and reveals the beauty of mathematics Acta Scientiarum Mathematicarum **Topology of Algebraic Curves** Hani Shaker, 2010-03 Let C be the plane algebraic curve defined by the polynomial P in two variables with complex coefficients The first question under investigations is Is there some relation between the reducibility of P and number of singularities of the the plane curve C $P(x, y) = 0$ The answer to this question we use topological and algebraic properties of the plane curves The second question is How many irreducible components the plane curve C $P(x, y) = 0$ has The answer to this question is directly related to the study of the topology of the complement of C in the complex plane by using de Rham cohomology The main problem is to extend this result for more variables and to obtain other related results on algebraic affine hypersurfaces **Introduction to Plane**

Algebraic Curves Ernst Kunz, 2007-06-10 Employs proven conception of teaching topics in commutative algebra through a focus on their applications to algebraic geometry a significant departure from other works on plane algebraic curves in which the topological analytic aspects are stressed Requires only a basic knowledge of algebra with all necessary algebraic facts collected into several appendices Studies algebraic curves over an algebraically closed field K and those of prime characteristic which can be applied to coding theory and cryptography Covers filtered algebras the associated graded rings and Rees rings to deduce basic facts about intersection theory of plane curves applications of which are standard tools of computer algebra Examples exercises figures and suggestions for further study round out this fairly self contained textbook

Shokurov, 2013-12-01 From the reviews This volume consists of two papers The first written by V V Shokurov is devoted to the theory of Riemann surfaces and algebraic curves It is an excellent overview of the theory of relations between Riemann surfaces and their models complex algebraic curves in

complex projective spaces The second paper written by V I Danilov discusses algebraic varieties and schemes I can recommend the book as a very good introduction to the basic algebraic geometry European Mathematical Society Newsletter 1996 To sum up this book helps to learn algebraic geometry in a short time its concrete style is enjoyable for students and reveals the beauty of mathematics Acta Scientiarum Mathematicarum **Real Algebraic Geometry and Topology** Selman Akbulut,1995 This book contains the proceedings of the Real Algebraic Geometry Topology Conference held at Michigan State University in December 1993 Presented here are recent results and discussions of new ideas pertaining to such topics as resolution theorems algebraic structures topology of nonsingular real algebraic sets and the distribution of real algebraic sets in projective space **A Topological Study of Certain Plane Algebraic Curves** Lucy Elizabeth Berger,1925
