Twentieth Century China New Approaches Rewriting Histories

Gabrielle M. Spiegel

Twentieth Century China New Approaches Rewriting Histories:

Twentieth-Century China Jeffrey N. Wasserstrom, 2013-10-14 Twentieth Century China New Approaches is an important revisionist study of China's recent past. The chapters throw light on a variety of subjects within the field which has recently undergone considerable change. The three major parts of this reader take into account the historical shape of the century, local perspectives on national history and reflections on cultural history. The chapters in this volume reflect a move away from a Western-centred analysis of Chinese history as well as the new wealth of archival material made accessible over the last decade. They highlight in challenging ways important topics that have generated considerable excitement among historians. Subjects discussed include the watershed date of 1949, feminism, the revolutions, the discourse of the communist party and political theatre in modern China.

Legacies of World War II in South and East Asia David Koh Wee Hock, 2007 Illustrates how the political and social fallout from the World War II is still alive and divisive in South and East Asia.

Practicing History Gabrielle M. Spiegel, 2005 This essential new collection of key articles from critical thinkers and practicing historians focuses on where history is now in terms of its theory and practice. For students, teachers and historians alike, this is an indispensable reader.

Medieval Religion Constance H. Berman, 2005 Constance Hoffman Berman presents an indispensable collection of the most influential and revisionist work to be done on religion in the Middle Ages in the last two decades. Bringing together an authoritative list of scholars from around the world, this book is a comprehensive compilation of the most important work in this field. Medieval Religion provides a valuable service for all those who study the Middle Ages, church history or religion.

Revolutionary Russia Rex A. Wade, 2004-07-31 This collection presents the major recent writings on the Russian Revolution and its context. It brings together key texts to illustrate new interpretive approaches and covers the central topics and themes. Together, the chapters in this volume form a coherent representation of both the events and the theories and debates that relate to them.

Feng Youlan and Twentieth Century China Xiaoqing Diana Lin, 2016-02-02 This is an intellectual biography of Feng Youlan. Feng Yu-lan (1895-1990) was one of the preeminent Chinese philosophers of the 20th century. Feng's life very well captured the vicissitudes of twentieth-century Chinese politics and scholarship. He made his name in the 1930s and 40s with a path-breaking approach to Chinese philosophy. And he was one of the few prominent pre-1949 non-Communist Chinese scholars who attempted to influence Chinese society with prolific publications. After 1949, this monograph explores Feng Youlan's work and the trajectory of changes in Feng's philosophical outlook against the social and political contexts of Feng's life from the 1920s to 1990. Feng's search for a framework of Chinese philosophy that is open and connected to foreign learning and a framework of self-cultivation that is open to outside ideas continues to be important goals for Chinese philosophy today.

The French Revolution Gary Kates, 2006 Collating key texts at the forefront of new research and interpretation, this updated second edition adds new articles on the Terror and race/colonial issues and studies all aspects of this major event from its origins through to its consequences.

Haitian

History Alyssa Goldstein Sepinwall, 2013 Despite Haiti's proximity to the United States and its considerable importance to our own history Haiti barely registered in the historic consciousness of most Americans until recently Those who struggled to understand Haiti's suffering in the earthquake of 2010 often spoke of it as the poorest country in the Western hemisphere but could not explain how it came to be so In recent years the amount of scholarship about the island has increased dramatically Whereas once this scholarship was focused on Haiti's political or military leaders now the historiography of Haiti features lively debates and different schools of thought Even as this body of knowledge has developed it has been hard for students to grasp its various strands Haitian History presents the best of the recent articles on Haitian history by both Haitian and foreign scholars moving from colonial Saint Domingue to the aftermath of the 2010 earthquake It will be the go to one volume introduction to the field of Haitian history helping to explain how the promise of the Haitian Revolution dissipated and presenting the major debates and questions in the field today **Origins of the Black Atlantic** Laurent Dubois, Julius S. Scott, 2013-01-11 Between 1492 and 1820 about two thirds of the people who crossed the Atlantic to the Americas were Africans With the exception of the Spanish all the European empires settled more Africans in the New World than they did Europeans The vast majority of these enslaved men and women worked on plantations and their labor was the foundation for the expansion of the Atlantic economy during the seventeenth and eighteenth centuries Until relatively recently comparatively little attention was paid to the perspectives daily experiences hopes and especially the political ideas of the enslaved who played such a central role in the making of the Atlantic world Over the past decades however huge strides have been made in the study of the history of slavery and emancipation in the Atlantic world This collection brings together some of the key contributions to this growing body of scholarship showing a range of methodological approaches that can be used to understand and reconstruct the lives of these enslaved people **China Review International** , 2004
