Mapping British Women Writers' Urban Imaginaries Arina Cirstea, 2016-01-13 This study provides an alternative to the postmodern tradition of writing about the city by exploring spatialized constructions of gender and spiritual identity through an integrative framework based on insights from Bachelard's topoanalysis, psychogeography, feminist cultural theory, and comparative literature and religion. *Writing, Reading, and Understanding in Modern Health Sciences* Milos

Jenicek, 2017-07-27 Medical articles are one of the main vehicles of knowledge translation and evidence communication in the health sciences. Their correct structure and style alone are no longer enough to convey a clear understanding of the intended message. Readers must be able to understand the very essence of the article message. That is the purpose of this book. *Writing, Reading, and Understanding in Modern Health Sciences: Medical Articles and Other Forms of Communication* will help the authors of medical articles communicate more effectively in today's practice and health research environment. It explores the most effective practices for communicating using three main medical literature formats: through scientific articles, articles where the subject is not based on the practice of the scientific method, and business reports. Describing how to think beyond the prevailing IMRAD article format, this book focuses on the nature, content, domains of thought, and meanings of medical articles. The ideas and underlying propositions in this book are complementary to specific requirements appropriate for each type of medical journal. After reading this book, you will better understand how to write what is considered the most important type of medical article: the research-based medical article. How to write an evidence-based argumentative medical article. The challenges of clinical case reporting. The general framework of medical and research ethics. Classification of medical articles and their underlying studies from the causal standpoint. Supplying you with the understanding required to write more effective medical articles, the book includes details about essay-type articles, research-based articles, thesis as introduction sections, definitions as part of the material and methods sections, modern argumentation and critical thinking, underlying results and their discussion, and conclusions about them. **Margaret Atwood: Crime**

Fiction Writer Jackie Shead, 2016-05-13 Exploring how Margaret Atwood's fiction reimagines the figure of the detective and the nature of crime, Jackie Shead shows how the author radically reworks the crime fiction genre. Shead focuses on *Surfacing*, *Bodily Harm*, *Alias Grace*, *The Blind Assassin*, *Oryx and Crake*, and selected short fiction, showing the ways in which Atwood's protagonists are confronted by their own collusion in hegemonic assumptions and thus are motivated to investigate and expose crimes of gender, class, and colonialism. Shead begins with a discussion of how Atwood's treatment of crime fiction's generic elements, particularly those of the whodunit, clue puzzle, and spy thriller, departs from convention. Through discussion of Atwood's metafictional strategies, Shead also examines Atwood's techniques for activating her readers as investigators who are offered an educative process parallel to that experienced by some of the author's protagonists. This book also marks a significant intervention in an ongoing debate among Atwood critics that pits the author's postmodernism against her ethical
