Against Art and Culture Liam Dee, 2017-12-12 Offering a negative definition of art in relation to the concept of culture this book establishes the concept of art culture to describe the unity of these two fields around named labour idealised creative subjectivity and surplus signification Contending a conceptual and social reality of a combined art culture this book demonstrates that the failure to appreciate the dynamic totality of art and culture by its purported negators is due to almost all existing critiques of art and culture being defences of a true art or culture against inauthentic manifestations and art thus ultimately restricting creativity to the service of the bourgeois commodity regime While the evidence that art culture enables commodification has long been available the deduction that art culture itself is fundamentally of the world of commodification has failed to gain traction By applying a nuanced analysis of both commodification and the larger systems of ideological power the book considers how the surplus of art culture is used to legitimate the bourgeois status quo rather than unravel it It also examines possibilities for a post art culture world based on both existing practices that challenge art culture identity as well as speculations on the integration of play and aesthetics into general social life An out and out negation of art and culture this book offers a unique contribution to the cultural critique landscape
