The Use Of Counseling Skills In Emergency Services Working With Trauma:

EBOOK: The Use Of Counselling Skills In The Emergency Services Angela Hetherington, 2001-04-16 This book examines the use of counselling skills in the unique working environment of the emergency services. It looks at the stress and trauma of emergency service work and draws extensively on the first hand experiences of personnel. The text considers how counselling skills can be employed effectively by emergency service professionals to enable them to fulfil their primary roles. In addition, the book discusses the trained use of counselling skills within a formal peer support program and by management. A major theme throughout the book is the psychological impact of traumatic incidents both on the victims and those involved in their rescue and recovery. This text considers the specific use of counselling skills in response to traumatic incidents from a professional, ethical and legal perspective. It will be of use to Fire, Police, Accident and Emergency, Ambulance and Security Services and to voluntary emergency services such as The British Red Cross. *Counseling Techniques* Rosemary A. Thompson, 2015-08-27 The third edition of *Counseling Techniques* follows in its predecessors' steps, presenting the art and science of counseling in a clear and common sense manner that makes it accessible for counseling students and seasoned practitioners alike. New to this edition are chapters on play therapy and a host of other updates that illustrate ways to use different techniques in different situations. *Counseling Techniques* stresses the need to recognize and treat the client within the context of culture, ethnicity, interpersonal resources and systemic support, and it shows students how to meet these needs using more than five hundred treatment techniques, each of which is accompanied by step by step procedures and evaluation methods. *Trauma Counseling, Second Edition* Lisa López Levers, 2022-02-24 The only comprehensive text to focus on trauma, stress, crisis and disaster counseling from a clinical practice perspective. This overarching text, intended both for mental health practitioners in training and for practicing clinicians, focuses on the impact of stress, crisis, trauma and disaster on diverse populations across the lifespan as well as on effective treatment strategies. The second edition is newly grounded in a trauma scaffold providing foundational information that therapists can build upon step by step to treat individuals affected by more complex trauma events. This resource newly addresses the mental health implications of COVID 19, which has had an enormous impact on multitudes of people since the beginning of the pandemic; its repercussions likely to continue for some time into the future. The text also is updated to provide the most recent diagnostic information regarding trauma in the DSM 5. Two new chapters address the confluence of crises related to anthropogenic climate change and the effects of mass violence. This unrivalled resource emphasizes stress management and crisis intervention skills as important building blocks for working with more complex issues of trauma and disaster. It underscores the idea that trauma must be approached from multiple perspectives and in multiple dimensions, encompassing individual, community, societal and systemic implications along with multicultural and diversity frames of reference. The text integrates the latest findings from neuropsychology and psychopharmacology with an emphasis on Polyvagal Theory. Additionally, the text highlights the importance of clinical

supervision in trauma care and examines ethical dimensions and the need for self care among trauma counselors Purchase includes digital access for use on most mobile devices or computers New to the Second Edition Reconceptualizes the text with the concept of a Trauma Scaffold as a foundation upon which to understand and develop treatment for increasingly complex trauma events Addresses the COVID 19 pandemic and its profound effect on the mental health of vast numbers of people Includes two new chapters on the confluence of crises related to anthropogenic climate change and the effects of mass violence Includes PowerPoint slides to accompany an updated Instructor s Manual Key Features Delivers both introductory and advanced clinical information addressing complex trauma Addresses trauma from a bioecological framework with emphasis on trauma informed practices multicultural pluralism diversity and social justice Considers neurobiological responses to trauma with new research and the contributions of Polyvagal Theory Examines individual familial community society and systemic understandings of stress crisis trauma and disaster Includes a wealth of resources for further study text boxes and case studies to reinforce learning
