The Wheel Inventions And Reinventions Columbia Studies In International And Global History:

The Wheel Richard W. Bulliet, 2016 A visually rich analytical history of the key cycles in a revolutionary technology

The Wheel Richard W. Bulliet, 2016-01-19 In this book Richard W Bulliet focuses on three major phases in the evolution of the wheel and their relationship to the needs and ambitions of human society He begins in 4000 B C E with the first wheels affixed to axles He then follows with the innovation of wheels turning independently on their axles and concludes five thousand years later with the caster a single rotating and pivoting wheel Bulliet s most interesting finding is that a simple desire to move things from place to place did not drive the wheel s development If that were the case the wheel could have been invented at any time almost anywhere in the world By dividing the history of this technology into three conceptual phases and focusing on the specific men women and societies that brought it about Bulliet expands the social economic and political significance of a tool we only partially understand He underscores the role of gender combat and competition in the design and manufacture of wheels adding vivid imagery to illustrate each stage of their development *A World More Equal*

Sandrine Kott, 2024-02-06 The post World War II period is typically seen as a time of stark division an epochal global conflict between the United States and the Soviet Union But beneath the surface the postwar era witnessed a striking degree of international cooperation The United Nations and its agencies as well as regional organizations international nongovernmental organizations and private foundations brought together actors from conflicting worlds fostering international collaboration across the geopolitical and ideological divisions of the Cold War Diving into the archives of these organizations and associations Sandrine Kott provides a new account of the Cold War that foregrounds the rise of internationalism as both an ideology and a practice She examines cooperation across boundaries in international spaces emphasizing the role of midsized powers including Eastern European and neutral countries Kott highlights how the need to address global inequities became a central concern as officials and experts argued that economic inequality imperiled the creation of a lasting peace International organizations gave newly decolonized and Third World countries a platform to challenge the global distribution of power and wealth and they encouraged transnational cooperation in causes such as human rights and women s rights Assessing the failure to achieve a new international economic order in the 1970s Kott adds new perspective on the rise of neoliberalism A truly global study of the Cold War through the lens of international organizations *A World More Equal* also shows why the internationalism of this era offers resources for addressing social and global inequalities today

Beauty in the Age of Empire Raja Adal, 2019-08-13 When modern primary schools were first founded in Japan and Egypt in the 1870s they did not teach art Yet by the middle of the twentieth century art education was a permanent part of Japanese and Egyptian primary schooling Both countries taught music and drawing and wartime Japan also taught calligraphy Why did art education become a core feature of schooling in societies as distant as Japan and Egypt and how is aesthetics entangled with nationalism colonialism and empire *Beauty in the Age of Empire* is a global history of

aesthetic education focused on how Western practices were adopted transformed and repurposed in Egypt and Japan Raja Adal uncovers the emergence of aesthetic education in modern schools and its role in making a broad spectrum of ideologies from fascism to humanism attractive With aesthetics educators sought to enchant children with sounds and sights using their ears and eyes to make ideologies into objects of desire Spanning multiple languages and continents and engaging with the histories of nationalism art education and transnational exchanges Beauty in the Age of Empire offers a strikingly original account of the rise of aesthetics in modern schools and the modern world It shows that while aesthetics is important to all societies it was all the more important for those countries on the receiving end of Western expansion which could not claim to be wealthier or more powerful than Western empires only more beautiful **Global Entanglements of a Man Who**

Identifying with Nationality Will Hanley,2017-04-04 Nationality is the most important legal mechanism sorting and classifying the world s population today An individual s place of birth or naturalization determines where he or she can and cannot be and what he or she can and cannot do Although this system may appear universal even natural Will Hanley shows that it arose just a century ago In *Identifying with Nationality* he uses the Mediterranean city of Alexandria to develop a genealogy of the nation and the formation of the modern national subject Alexandria in 1880 was an immigrant boomtown ruled by dozens of overlapping regimes On its streets and in its police stations and courtrooms people were identified by name occupation place of origin sect physical description and other attributes Yet by 1914 before nationalist calls for independence and decolonization had become widespread nationality had become the defining category of identification and nationality laws came to govern Alexandria s population *Identifying with Nationality* traces the advent of modern citizenship to multinational transimperial settings such as turn of the century colonial Alexandria where ordinary people abandoned old identifiers and grasped nationality as the best means to access the protections promised by expanding states The result was a system that continues to define and divide people through status mobility and residency

The Limits of Westernization Perin E. Gürel, 2017-05-30 In a 2001 poll Turks ranked the United States highest when asked Which country is Turkey's best friend in international relations When the pollsters reversed the question Which country is Turkey's number one enemy in international relations the United States came in second How did Turkey's citizens come to hold such opposing views simultaneously In The Limits of Westernization Perin E. Gürel explains this unique split and its echoes in contemporary U.S.-Turkey relations Using Turkish and English sources Gürel maps the reaction of Turks to the rise of the United States as a world ordering power in the twentieth century As Turkey transitioned from an empire to a nation state the country's ruling elite projected westernization as a necessary and desirable force but also feared its cultural damage Turkish stock figures and figures of speech represented America both as a good model for selective westernization and as a dangerous source of degeneration At the same time U.S. policy makers imagined Turkey from within their own civilization templates first as the main figure of Oriental barbarism i.e. the terrible Turk then during the Cold War as good pupils of modernization theory As the Cold War transitioned to the War on Terror Turks rebelled against the new U.S. made trope of the moderate Muslim Local artifacts of westernization folk culture crossed with American cultural exports and alternate projections of modernity became tinder for both Turkish anti-Americanism and resistance to state led modernization projects The Limits of Westernization analyzes the complex local uses of the West to explain how the United States could become both the best and the worst in the Turkish political imagination Gürel traces how ideas about westernization and America have influenced national history writing and policy making as well as everyday affects and identities Foregrounding shifting tropes about and from Turkey a regional power that continues to dominate American visions for the modernization of the Middle East Gürel also illuminates the transnational development of powerful political tropes from the Terrible Turk to the Islamic Terrorist
