Transforming Public Space through Play Gregor Mews,2022-04-21 This book provides an empirical analysis of the concept of play as a form of spatial practice in urban public spaces The introduced City Play Framework CPF is a practical urban analysis tool that allows urban designers landscape architects and researchers to develop a shared awareness when opening up this window of possibility for adventure Two case studies substantiate and illustrate the development process and testing of the framework in Canberra Australia and Potsdam Germany The appropriation of public spaces that transcend boundaries can facilitate an intrinsic connection between people and their immediate environment towards a more joyful ontological state of human existence in which imagination co creation and a sense of agency are key elements of the design approach The framework presents an alternative understanding of public spaces and public life reflecting on theory and its implications for practice in a post pandemic world in dense urban centres A bridge between theory and practice this book explores possibilities on what future design ought to be when openness and ambiguity are consciously integrated parts of

practice and process The book presents a valuable discussion on public space and play for academic audiences across a wide range of disciplines such as landscape architecture urban design planning architecture and urban sociology which is informative for future practice

Teaching, Learning & Researching Roberto Rocco, Gregory Bracken, Caroline Newton, Marcin Dabrowski, 2022-09-22 This book is composed of a general introduction followed by 18 chapters written by teachers and researchers from TU Delft as well as frequent collaborators each describing an issue or tool used in Spatial Planning as it is taught and researched at our university The book aims to give readers around the world an introduction to how spatial planning is conceived at TU Delft Spatial planning is a highly idiosyncratic discipline and is conceived differently around the world In most places spatial planning is part of an architectural approach to the city in which design exists almost autonomously while in other places it is part of a political economical approach to the city What distinguishes Delft is the bridge we have managed to build between design and politics and the way we understand space as foundational for the understanding of socio economic processes This is anchored on a Dutch tradition of city making in which issues of *maakbaarheid* roughly translated by feasibility a guiding concept in Dutch society which was built upon an exceedingly difficult territory to plan design and manage Spatial planning in the Netherlands is hence a combination of planning design and management that is unique Simultaneously spatial planning as a discipline in the Netherlands is rather forward thinking and uniquely equipped to deal with the great societal challenges of our time climate change pandemics growing inequality etc and may be useful for students and teachers elsewhere seeking to learn from other traditions Each chapter addresses issues that we see as central to the way of teaching and researching spatial planning

The Dialectics of Urban and Architectural Boundaries in the Middle East and the Mediterranean Suzan Girginkaya Akdağ, Mine Dinçer, Meltem Vatan, Ümran Topçu, İrem Maro Kırış, 2021-06-01 This edited volume informs readers about changing norms and meanings of borders and underlines recent scenarios that shape these borders It focuses mainly on the Mediterranean and Middle East regions through the following questions What are the social cultural philosophical political economic and aesthetic reasons for spatial segregation within contemporary territories and cities In the world of globalization and networks what are the new limitations of space What are the alienating differences between interior and exterior private and public urban and rural local and global and real and virtual Are spatial definitions and divisions more likely to be weakened if not totally erased by effects of globalization and mobility similar to the dissolution of borders between countries Or are local practices and measures likely to become more apparent with emerging trends such as sustainability and identity Authored by international scholars all chapters are arranged under four main parts Urban and Rural Global and Local Physical and Sensual Real and Virtual Hence different concepts and definitions of borders along with varying methods and tools for questioning their essence in architectural and urban spaces will be introduced For example in the rural and urban context environments settlements housing landscape transformation conservation and development in the global and local context styles identity

universal design sustainability globalization and networks mobility and migration in the physical and sensual context design studies and methodologies environmental psychology aesthetic reasoning sense of place and well being and in the real and virtual context realities tools and communities are the main themes of the chapters This book will be an essential source for professionals scholars and students of architecture and urban design with a view to understanding multidisciplinary perspectives in designing borders as well as the dialectical relationship between borders and space

Understanding Tall Buildings Kheir Al-Kodmany, 2017-02-17 In recent years the rapid pace of tall building construction has fostered a certain kind of placelessness with many new tall buildings being built out of scale context and place By analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire stimulate and engage Understanding Tall Buildings contends that well designed tall buildings can rejuvenate cities ignite economic activity support social life and boost city pride Although this book does not claim to possess all the solutions it does propose specific tall building design guidelines that may help to promote placemaking Through this work it is the author's hope that ill conceived developments will become less common in the future and that good placemaking will become the norm not the exception This book is a must read for students and practitioners working to create better tall buildings and better urban environments

Urban Sustainability Through Environmental Design Kevin Thwaites, Sergio Porta, Ombretta Romice, Mark Greaves, 2007-12-06 What can architects landscape architects and urban designers do to make urban open spaces streets and squares more responsive lively and safe Urban Sustainability through Environmental Design answers this question by providing the analytical tools and practical methodologies that can be employed for sustainable solutions to the design and management of urban environments The book calls into question the capability of quick fix development solutions to provide the establishment of fixed communities and suggests a more time conscious and evolutionary approach This is the first significant book to draw together a pan European view on sustainable urban design with a specific focus on social sustainability It presents an innovative approach that focuses on the tools of urban analysis rather than the interventions themselves With its practical approach and wide ranging discussion this book will appeal to all those involved in producing communities and spaces for sustainable living from

students to academics through to decision makers and professional leaders

Smart Cities Policies and Financing John R. Vacca, 2022-01-19 Smart Cities Policies and Financing Approaches and Solutions is the definitive professional reference for harnessing the full potential of policy making and financial planning in smart cities. It covers the effective tools for capturing the dynamic relations between people, policies, financing, and environments and where they are most often useful and effective for all relevant stakeholders. The book examines the key role of science, technology, and innovation (STI) especially in information and communications technologies in the design, development, and management of smart cities, policies, and financing. It identifies the problems and offers practical solutions in implementation of smart infrastructure, policies, and financing. Smart Cities Policies and Financing is also about how the implementation of smart infrastructure projects related to the challenges of the lack of financing and the application of suitable policies underlines the key roles of science, technology, and innovation (STI) communities in addressing these challenges and provides key policies and financing that will help guide the design and development of smart cities. Brings together experts from academia, government, and industry to offer state-of-the-art solutions for improving the lives of billions of people in cities around the globe. Creates awareness among governments of the various policy tools available such as output-based contracting, public-private partnerships, procurement policies, long-term contracting, and targeted research funds in order to promote smart infrastructure implementation and encouraging the use of such tools to shape markets for smart infrastructure and correct market failures. Ensures the inclusiveness of smart city projects by adequately addressing the special needs of marginalized sections of society including the elderly, persons with disabilities, and inhabitants of informal settlements and informal sectors. Ensures gender considerations in the design of smart cities and infrastructure through the use of data generated by smart systems to make cities safer and more responsive to the needs of women. Demonstrate practical implementation through real-life case studies. Enhances reader comprehension using learning aids such as hands-on exercises, checklists, chapter summaries, review questions, and an extensive appendix of additional resources.
