2011-01 , **Money Raising Masterclass** Norman Meier,2020-05-17 There are a total of 46.8 million millionaires worldwide at the beginning of the year 2020 and they collectively own approximately 158.3 trillion There are millions of millionaires in the world and the number is increasing with each year The only question that you should ask yourself is why you are not one of them yet How did those people become millionaires or even billionaires Did they have a great 9 to 5 job that paid them really well Most definitely not They are all business owners and own shares of their own public company No one becomes a billionaire by simply earning a salary from a job each year People become wealthy by owning a significant share position in a company that is listed in the stock market But how did they start out How do you become a multi millionaire They all started with a business idea Then they incorporated a corporation issued shares for themselves and raised money from investors Eventually they took the company public in the stock market and it was valued a several hundred millions of dollar I have raised 40 million in 2.5 years from 500 investors and his company was valued at over 300 million in the stock market Actually I raised over 400 million from private investors and 600 million from institutional investors in my career since 1995 But the goal of this book is to teach you the things that you need to know to raise the first one or two million dollars by yourself so that you can take your company public in the stock market and attract millions more afterwards This book will teach you everything about this process and how I have done it *Changing Business from the Inside Out* Timothy Mohin,2017-09-08 Corporate responsibility is considered an oxymoron by much of society Corporations

are among the least trusted of our institutions and the 2008 financial crisis BP's oil spill in the Gulf of Mexico and the collapse of the house of cards that was Enron have only added to public skepticism. So at a time when trust in corporations has reached an all time low why is interest in corporate responsibility at an all time high? A plausible explanation is that increasing numbers of stakeholders are demanding responsibility from corporations. Hyper transparency of corporate activities fueled by disclosure laws and the Internet has increased awareness to the point where corporate behavior is under constant scrutiny. Smart business leaders are aware of this scrutiny and of the high costs of a public scandal. They know that in the long run it is cheaper to act responsibly now than to dig out from a PR disaster later. Tim Mohin is a veteran corporate responsibility practitioner who has led programs at Apple, Intel and AMD. In this book Tim tells us why he believes he is making a difference where it counts and how others can do the same. His book is a manual on how to steer the corporate supertanker toward doing good for people and our planet. *Changing Business from the Inside Out* provides a fascinating roadmap to the corporate responsibility and sustainability field from beginning a career to forming a program to navigating the complicated politics of a corporation. Mohin likens the corporate treehugger role to being the designated driver at the corporate cocktail party. Throughout his book he argues strongly that activists can accomplish more for the planet and society by serving as a voice of responsibility within the corporation rather than protesting outside the factory gates. Corporations are clearly the drivers of the world economy and the corporate responsibility practitioner has an essential role in bringing ethical and sustainable values to the C suite and making sure that they are accomplished. Whether you are a practitioner needing advice, a mid career professional wanting to change course or an MBA wondering how to incorporate responsibility into your career this book has the answers you need. *Investment Leadership* Jim Ware, Beth Michaels, Dale
